b. has been subject to such filing requirements for the past 90 days.
Yes [✓] No [ ]

13. Aggregate value of the voting stock held by non-affiliates: **P 284 Million**

14. Documents incorporated by reference. **None**

PART I – BUSINESS AND GENERAL INFORMATION

Item 1 - Business

The RFM Group

RFM Corporation (the "Company") is a major player in the food and beverage industry in the Philippines, specifically in the processing and manufacture of flour, bread, flour-based products like pasta and cake mixes, sauces, milk and juice drinks, and ice cream.

The Company also operates non-food businesses, which include barging services (Rizal Lighterage Corporation) and leasing of commercial/office spaces that serves the internal requirement of the various operating divisions.

History and Business Development

RFM Corporation was incorporated on August 16, 1957 as Republic Flour Mills, Inc. to manufacture flour in the Philippines, a country which does not grow wheat, in order to contribute to the country's greater self-reliance in basic food. From its original business of flour milling, the Company diversified into poultry and livestock production and areas of food manufacturing that includes flour-based products, margarine, milk & juices, canned and processed meat, ice cream, and bottled mineral water.

After RFM established itself in the flour milling business, the Company, in 1963, commissioned new plant facilities to produce cooking oil and margarine. This was then followed by the establishment of a feed mill in 1965 to manufacture poultry and hog feeds, of which key raw materials – bran and pollard – were by-products of the flour operations.

In the early 1971, RFM integrated forward into hog and poultry breeding. It entered into a licensing agreement with Peterson Industries and H & N Layers to breed day-old chicks. The Company, though, divested from the hog operation in 1994, and in the poultry business in 2003 by way of property dividends to its shareholders.

In 1973, the Company signed an exclusive licensing agreement with Swift and Company of Illinois (now Armour Swift & Echrich of the ConAgra Group). This move initiated the entry of RFM into the business of chilled and canned meat processing using the "Swift" brand name. A continuous meat processing plant, the first in the country, was constructed in 1975. The "Swift" brand name was eventually purchased by RFM in 1987, allowing the Company the rights to its exclusive use in the Philippines. The "Swift" brand name is being shared by RFM and Swift Foods, Inc. in their production and sale of processed meat and chicken products, respectively.

From the 1970s to 1980s, RFM concentrated primarily on growing its established core businesses. It also introduced grocery items, such as cake mixes, hotcake mixes, and ingredient mixes during this period.

As RFM began to enter the 1990s, it envisioned itself to become a truly diversified Food Company catering to the Filipino taste. This goal was and continues to be implemented through two approaches: strategic acquisition of Filipino companies with strong local brands, and partnerships with internationally renowned food institutions.

This vision was first manifested in the purchase of Cosmos Bottling Corporation (Cosmos), a Filipino softdrinks company, in 1989, from the Wong Family. Then in 1990, RFM acquired the "Selecta" trademark from the Arce Family. RFM invested in new machinery under a new company, Selecta Dairy Products, Inc. (Selecta), to mass produce the locally famous ice cream flavors within international health standards. And in 1993, the Company ventured into the production of ready-to-drink (RTD) ultra-heat treated (UHT) milk and juices in tetra-packaged format using the brand names Selecta Moo and Sunkist, respectively.

In 1994, Swift, Selecta, and Cosmos conducted an initial public offering of its shares of stock through the Philippine Stock Exchange.

A year later, in 1995, the Company incorporated RFM Properties and Holdings, Inc. to consolidate its real estate assets as well as to break into the land and housing development business. The company was later renamed Philippine Townships, Inc. In 2008, the company was again renamed to Philtown Properties, Inc.

RFM continued to expand its businesses as it ventured into noodle manufacturing, tuna processing, bakeshop business with the acquisition of the Rolling Pin trademark, food franchising with the use of Little Ceasar's Pizza brand of the USA, and thrift banking under Consumer Bank.

The Asian Financial Crisis of 1997, however, put a halt to the business expansion of RFM. The ensuing economic slowdown, more cutthroat market competition, and the dearth of capital financing weighed heavily on the financial operations of the Company. Furthermore, the US$83.7M bond, which it obtained in 1996, became due in 2001, and its payment forced RFM to sell many of its operating subsidiaries, including Consumer Bank which was sold to Philippine Bank of Communications, and Cosmos which was sold to Coca-Cola Inc. and San Miguel Corporation.

In 2003, the company's common shares from Swift Foods, Inc. were declared as property dividends to its stockholders. Likewise, the company's common shares from Philtown Properties, Inc. (formerly Philippine Townships, Inc.), the property company, were declared as property dividends in tranches in 2008, 2009 and 2012. However, the company remains committed in liquidating its landholdings through the development of middle income housing enclaves. It also builds condominium projects in saleable areas in Fort Bonifacio, Rockwell, and Taft.

The remaining business, nevertheless, gives RFM the foundation to build on. Within the Parent Company, the original business of flour making continues; as well as branded food products such as Swift processed chilled and canned meats like hotdogs, vienna sausage, and corned beef, Sunkist Juices, Selecta Milk, Fiesta Pasta Noodles, White King Hot Cake, Butterfresh Margarine, among others. The ice cream business remains profitable and is presently co-owned with Unilever Philippines, under a new corporate name, Unilever RFM Ice Cream, Inc.

In late 2012, RFM entered into a Trademark and Asset Purchase Agreement with The Pacific Meat Company, Inc. (PMCI). The terms of this agreement includes RFM's sale of the "Swift" brand, together with finished goods and raw material inventories, the goodwill of the business connected with the trademarks used for its canned, pouch flexible heat sterilized, refrigerated, chilled and frozen meat products, and certain machinery and equipment, as well as all product formulations, processes, know-how and other technical information relating to the production of meat products.

Early 2014, RFM purchased the Royal pasta trademark and inventory stocks from Unilever Philippines, Inc. (ULP). The company believes this would allow RFM to tighter its market leadership in the pasta category.

The Group and the Products

Food Businesses

RFM Corporation (Parent Company)

RFM Corporation operates two major business segments:

- Institutional segment, which primarily manufactures and sells flour, bakery and other bakery products to institutional customers; and
- Consumer segment, that manufactures and sells ice cream, milk and juices, pasta products, and flour and rice-based mixes.

See table on sales.

Unilever RFM Ice Cream, Inc. (formerly Selecta Wall's Inc.)

Unilever RFM Ice Cream, Inc. is a joint venture enterprise owned 50%-50% by RFM Corporation and Unilever Philippines, Inc. It is engaged in the business of manufacturing, marketing, distributing and selling, importing and exporting of ice cream, ice cream desserts and ice cream novelties, and similar food products.

RFM Foods Philippines Corporation

Established in 1991 as RFM-Indofood Philippines Corporation, then a joint venture company between RFM Corporation and Indofood of the Salim Group of Indonesia, the company's main product lines were instant noodles of various flavors and packaging. The Company, however, ceased operations in October 2000 due to operating losses. The company has been renamed RFM Foods Philippines Corporation, and remains dormant.

Southstar Bottled Water Company, Inc.

Southstar Bottled Water Company, Inc. (Southstar) was incorporated in 1992 to manufacture and distribute all kinds and classes of bottled water, carbonated water, drinking water, fluoridated water, mineral water, natural water, purified water, spring water, well water, flavored water, as well as bottling equipment, purification equipment, coolers, dispensers, water treatment plants, water bottling plants, bottles, crates, including their accessories, attachments, spare parts and any merchandise of similar nature. Southstar, however, suspended its operations due to sustained operating losses.

Engrain – RFM Pacific, Inc.

Engrain – RFM Pacific Inc. (ERPI) is a joint venture owned 50% - 50% by RFM Corporation and Engrain LLC. It was incorporated in June 2013 to engage in the business of selling, marketing and distributing wholesale enzyme-enhanced flour and products for the Philippines and Asia Pacific market.

FWBC Holdings, Inc.

FWBC Holdings, Inc. is 83.38% owned by RFM Corporation, and organized in 2001 to hold and manage Filipinas Water Bottling Corporation (FWBC). FWBC is involved in the processing and distribution of bottled mountain spring water. FWBC, however, ceased operations in June 2012 due to operating losses.

Non-Food Businesses

RFM Equities, Inc.

RFM Equities Inc. is a holding company that is 100% owned by RFM. It was organized in 1996 to hold and manage RFM Corporation's holdings in two small financial services subsidiaries – Conglomerate Securities and Financing Corporation (CSFC) and RFM Insurance Brokers, Inc. (RIBI). CSFC provides consumer-financing services mainly to the managers and employees of the RFM Group. RIBI meanwhile services the insurance needs mainly of the RFM Group, affiliates and business partners. In January 2014, shares in both CSFC and RIBI had been sold.

Rizal Lighterage Corporation

Rizal Lighterage Corporation (RLC) is a barging company that is 93.51% owned by RFM Corporation. It is primarily engaged in providing lighterage and cargo handling services.

WS Holdings, Inc.

WS Holdings, Inc. is 60% owned by RFM Corporation and 40% owned by Unilever Philippines, Inc. It was incorporated and registered with the Securities and Exchange Commission in 1999 to invest in, purchase and own shares of stocks, bonds and other securities of obligations including real estate and personal property of any foreign or domestic corporation, or partnership, or association.

Selecta Wall's Land Corporation

Selecta Wall's Land Corporation was incorporated in 1999 to acquire, own, use, develop and hold for investment all kinds of real estate. RFM Corporation owns 35% of this company.

Contribution to Sales

The Group is primarily engaged in manufacturing, milling, and marketing of food and beverage products. The Group operates its business through the business units identified below. Information as to the relative contribution of the divisions and business to total sales are as follows:

	Spaghetti and Sauce bundles	P119 Fiesta Sweet Spaghettipid, P119 Fiesta 3 Cheese Spaghettipid, P109 Fiesta Filipino Spaghettipid, P59 Sweet Spaghettipid, Fiesta Spartyghetti, Royal Sweet Celebration, and Royal Cheesy Celebration	
	Margarine	Selecta Butterfresh	
	RTD Juice, RTD Tea, RTD Milk and Choco Milk, RTD Flavored Milk and RTD Functional Drinks	Sunkist Premium Juice, Sunkist Tetra Juice Drink, Sunkist Juice Drink Doy Packs, Sunco Green Tea and Lemon Tea (Export only), Selecta Moo, Selecta Fortified Low Fat Choco, Selecta Fortified Low Fat Milk, Selecta Fortified Filled Milk, Selecta Fortified Vanilla Milk, Selecta Full Cream Milk, Choco Yey!	
	Ice Cream products	Selecta Supreme, Selecta Super Thick Classic, Selecta Birthday 3-in-1, Selecta Co-brand, Carte D'or, Magnum, Selecta Cornetto, Selecta Cornetto Disc, Selecta Ice Cream Sticks, Selecta Pinipig, Selecta Ice Cream Sandwich, Paddle Pop Watermelon	
Others			0.69%

Domestic and Export Sales

The amounts of revenue, profitability, and identifiable assets attributable to domestic and export operations for 2019, 2018 and 2017 in **Million Pesos** are as follows:

	2019	%	2018	%	2017	%
Sales						
Domestic	15,193	99	13,871	99	12,590	99
Foreign (Export)	137	1	200	1	154	1
	15,330		14,071		12,744	

	2019	2018	2017
Operating income			
Domestic	1,619	1,391	1,384
Foreign (Export)	40	68	63
	1,659	1,459	1,447

Total Assets (All Domestic)	18,547	16,796	15,919

Distribution Methods of the Products or Services

The company engages in different methods of distribution depending on the products/services to meet the needs of customers.

RFM Corporation sells its products through the following accounts: modern trade accounts, distributor accounts, secondary accounts, food service, institutional customers, flour dealers, flour end users and Good Values company store. Modern trade and distributor accounts comprised of hypermarkets, supermarkets, groceries, convenience stores and wholesalers.

Status of New products, Market and Competition

In 2019, RFM remains to be the biggest manufacturer in pasta and sauce with 32% volume share and 29% value share, as it continues to strengthen its two major pasta brands, Fiesta and Royal. As the category continues to shift to the pasta and sauce bundles, RFM has put its efforts in growing and dominating this category. It has successfully done this and was able to gain market leadership, ending the year with 41% volume share and 44% value share, with both Fiesta and Royal growing double digits.

FIESTA

Focus on Birthdays and Drive Spaghetti Consumption

Being the market leader in total spaghetti, Fiesta has been looking for ways to expand and grow the pasta and sauce category further. However, the current challenge of the brand is how to increase the frequency of spaghetti preparation. Current frequency at home is still twice (2x) a year only – Christmas & birthday. To grow the category, there is an opportunity to increase frequency of consumption of current spaghetti users. Fiesta saw this opportunity and leveraged on one of the most celebrated occasions in the Philippines – Birthdays. Fiesta launched its latest campaign on Birthdays and used Vice Ganda as its newest endorser and Fiesta Spaghettipid as its main product feature. For only P119 or P109 pesos, Fiesta Spaghettipid enables moms to serve an affordable yet delicious and satisfying spaghetti during birthdays which is good for an entire party. Key communication of the TVC highlighted Fiesta's firm spaghetti and its delicious spaghetti sauces – Fiesta 3 Cheese Spaghetti Sauce and Fiesta Filipino Spaghetti Sauce with Banana Ketchup. Thru Fiesta Spaghettipid, RFM aims to enable more Filipino families to celebrate birthdays and prepare spaghetti more frequently.

Opportunity for Fiesta to Build on a New Occasion

In order to further grow the brand, Fiesta still needs to continuously search for new occasions for spaghetti consumption. With affordable products such as Fiesta P59 Sweet Spaghettipid or Fiesta P59 Curly Spaghettipid that is good for 8 servings, it has the opportunity to latch on its affordability against the P50.00 spaghetti in fast food chains good for 1 servings or the instant spaghetti worth P20.00 that is still good for one. Not only that, Fiesta has the opportunity to tap a new occasion that is outside celebrations but is still very much a part of a Filipino household. This new occasion is different from birthdays in terms of budget and cooking preparation.

ROYAL

Focus on Spaghetti + Spaghetti Sauce Dish Bundle

Royal has always been known as a pasta brand. It is known to be the pasta expert for over 100 years. However, the brand saw an opportunity in another category - Spaghetti + Spaghetti Sauce dish bundles. For the past 5 years, this category is seen as the fastest growing category and has been continuously growing double digits, year on year. Many pasta and spaghetti sauce players have entered this category and so did Royal starting 2016. The brand initially launched one variant – Royal Sweet Celebration (Royal Spaghetti + Royal Sweet Style Spaghetti Sauce). By 2017 and 2018, it completed its range of variants by launching two more dish bundles – Royal Cheesy Celebration (Royal Spaghetti + Royal 4 Cheese Spaghetti Sauce) and Royal Pinoy Celebration (Royal Spaghetti + Royal Filipino Style Spaghetti Sauce).

In 2019, as RFM continuously sees potential in the dish bundle category, Royal will focus its efforts in growing further its dish bundles. Growth will be via full placement and visibility in key channels and stores, and dedicated in-store activities and promos for all three Royal Dish Bundles. Also, all sales and marketing support and communication will be towards pushing for Royal dish bundles' awareness and sales.

Distribution Focus and Drive

Royal still has the biggest opportunity to grow by simply fixing its on-shelf availability and visibility in key channels – supermarkets and groceries across all areas, nationwide. Those two channels alone cover 94% of total dish bundle and spaghetti sauce sales.

Currently, all three Royal Dish Bundles still have a big opportunity to grow its distribution in key channels and other smaller supermarkets and groceries, nationwide. The target to reach 100% distribution and on-shelf availability is the thrust for 2019. With the push in distribution, it is expected to improve and increase offtake and the baseline sales of Royal dish bundles.

Opportunity for Royal in Spaghetti Sauce

The spaghetti sauce category is a 2.4B business. The current market leader leads this category with market share of 56%. Royal recently joined this category by launching its very own organic spaghetti sauces starting last 2016, and completed its range last 2018. For 2019, Royal saw an opportunity to launch a promo scheme that will be more aggressive in pushing its spaghetti sauce. Objective is to get the market leader users to try and switch to Royal Spaghetti Sauce by offering an affordable promo bundle that is perfect to use for any celebrations or birthdays. The promo is a Buy 2 Royal Spaghetti Sauce 1kg for only P100, save as much as P40. Launch started in March and will be placed until end of the year.

In a test market conducted prior to the launch, this new Royal Spaghetti Sauce promo is expected to bring in an additional 15% growth to the total Royal brand.

Fiesta and Royal brands will continue to build equity as they aim to become powerhouse brands through more awareness, more trial among consumers and building new occasions.

SELECTA MILK & SUNKIST JUICE

RFM's fastest growing brand in 2019 was Selecta, etching its name in the RTD Milk Category. Based on Nielsen FY 2019, Selecta Milk is now the leading brand of RTD white milk in volume and remains to be the category's fastest growing white milk brand. Selecta Fortified Milk, Selecta's core product, grew by 48%, outperforming the milk market growth of 10% in 2019.

However it was a challenging year for RTD Juices as the category has yet to recover from the ill-effects of the excise tax on sugar-sweetened beverages implemented in 2018. Sunkist stood against odds with various consumer and trade promotions; staying true to its promise of being the trusted affordable orange juice drink brand for the Filipinos.

To sustain leadership and growth for Selecta this 2020, Selecta Fortified Sterilized Milk was recently launched. This new Fortified Sterilized Milk caters to the needs of the busy working class, offering on-the-go, single-serve cow's milk with a creamy, malinamnam taste that one will surely like. This is enriched with vitamins to help one get through the day. This will be available in 245mL pack, 45mL more than leading brand at a more affordable price.

The Selecta Ice Cream business, under the joint venture with Unilever Philippines, Inc. (ULP) continued to dominate the ice cream category with 76.5% market share. It has launched various ice cream innovations both in the bulk ice cream category (in containers) and the impulse (single-served) category. For the bulk ice cream, it launched favorite Filipino desserts-inspired and trendy flavors for the summer and Christmas seasons under the Supreme platform. Selecta also relaunched its Cookies and Cream Hersheys Cobranded Line which generated good growth for bulk ice cream. On impulse, Selecta Cornetto launched new flavors for the core line and had a major relaunch of its premium line, Cornetto Disc. Magnum also drove growth in the Impulse segment with its back-to-core campaign and strong limited edition flavors.

Competing companies such as Nestle (7.7% market share), Magnolia (7.5% market share), and small brands continue to be aggressive, particularly in the bulk ice cream segment. New player Aice in Impulse segment also entered the market.

For the flour business, the company continues to provide commodity flour to several institutional accounts and flour-based product manufacturers and retailers like biscuits, noodles cakes and bread-makers. There are eleven flour millers in the country, under two trade associations – Philippine Association of Flour Millers (PAFMIL) and Chamber of Philippine Flour Millers, Inc. (Champflour). RFM Corporation is a member of PAFMIL. The Company has about 8% to 9% of total industry volume sales.

Purchases of Raw Materials and Supplies

RFM Corporation sources Raw and Packaging materials both domestic and overseas.

The Company imports Wheat from U.S. Tomato Paste currently sourced in China.

Dairy commodity such as Skimmed Milk Powder, Buttermilk Powder and Anhydrous Milk Fat mostly bought from Oceania region, though, open to U.S. and Indian origins.

Other imported materials procured from countries such as, but not limited to, Germany, U.S., China, Taiwan, Singapore and Thailand.

Payment terms vary for each supplier. It ranges from Letter of Credit, Documents against Payment at Sight, Telegraphic Transfer and other applicable payment terms agreeable to both parties.

Customers

RFM Corporation has a wide range of products that cater to all socio-economic class and all age groups.

Its products are sold through hypermarkets, supermarkets, groceries, convenience stores, drug stores, wholesalers, distributors, institutional customers, food establishments, flour dealers, flour end users and the company store.

RFM Corporation is not dependent on any single or few customers that might have any material adverse effect on its business, except for the processing and exclusive sale of hamburger buns, muffins and hotcake to Golden Arches (McDonald's) and hotdog buns to Philippine Seven Corporation (7-11). These buns account for about 95% of the total sales of Private Label Manufacturing Division of RFM Corporation in 2019 and 97% in 2018.

Related Party Transactions

The Group, in the regular course of business, transact with related parties, which may consist but not limited to the following:

- Purchase of goods and services.

- Lease of the plant, property and equipment for manufacturing operations.
- Lease of office spaces as Lessor
- Distribution, sale and merchandising of RFM Group products.
- Service Agreement with Unilever Philippines.
- Management service income and service fees with URIC.

Trademark, Royalty and Patents

A Trademark License Agreement was entered into with Unilever RFM Ice Cream, Inc. for the exclusive right to use the "Selecta" trademarks in its ice cream products and to manufacture, market, and sell Selecta trademarked products. The agreement shall be co-terminus with the Joint Venture Agreement between RFM Corporation and Unilever Philippines, Inc. The license is free from royalty fee and any similar kind of payment. On December 3, 2008, the Trademark License Agreement was extended for another ten (10) years, or from March 30, 2009 to March 29, 2019.

On 01 January 1995, RFM entered into a Trademark License Agreement (TLA) with Sunkist Growers, Inc. (Sunkist). Under the said agreement, Sunkist grants RFM (a) exclusive right, without the right to sublicense, to use the Sunkist Trademark(s) and related Trade dress approved by Sunkist, in connection with the marketing, distribution and sale of licensed products in the Philippines; (b) exclusive right, without the right to sublicense, to use the Know-How within the Philippines for the production and sale of Licensed Products; (c) the right and privilege to receive technical assistance regarding the implementation of Know-How; and (d) to make available Base Ingredients directly or through authorized Base Ingredients Suppliers to enable RFM to manufacture Licensed Products. For and in consideration of the rights granted above, RFM pays an annual royalty to Sunkist. The Amendment to the TLA was extended for another five (5) years or from 01 January 2005 to 31 December 2009. Another Amendment extending the TLA for another five years was signed by the Parties on 27 January 2010.

On 13 March 2009, Swift Foods, Inc. (SFI) re-assigned and returned to RFM all its rights and interests in the well-known Swift trademark. IPO registration of the mark has been transferred under RFM and a new Certificate of Registration has accordingly been issued to RFM.

In late 2012, RFM entered into a Trademark and Asset Purchase Agreement with The Pacific Meat Company, Inc. (PMCI). The terms of this agreement includes RFM's sale of the "Swift" brand, together with finished goods and raw material inventories, the goodwill of the business connected with the trademarks used for its canned, pouch flexible heat sterilized, refrigerated, chilled and frozen meat products, and certain machinery and equipment, as well as all product formulations, processes, know-how and other technical information relating to the production of meat products.

In January 2014, the Group acquired the Royal trademark from the Unilever Group for ₱2.1 billion (US$46.0 million).

Need for Any Government Approval of Principal Products and Compliance with Environmental Laws

The Group complies with environmental laws and secures government approval for all its products. The Company has existing permits from various government agencies that include the Bureau of Food and Drug (BFAD) and the City Environment and Natural Resources Office (CENRO). The Company also complies with the requirements of Laguna Lake Development Authority (LLDA) for environmental sanitation purposes.

The Company believes that it has complied with all applicable environmental laws and regulations, and incurred about ₱165,461.20 and ₱352,954.10 during the years 2018 and 2017, respectively, for payment of annual permits and fees.

The Group has no knowledge of recent or impending legislation, the implementation of which can result in a material adverse effect on the business or financial condition.

Research and Development Activities

The Company invests in Research and Development (R&D) which is necessary for corporate viability. R&D activities focus on customer and consumer satisfaction through innovation via new product development and/or improvement, in new or existing categories via line extensions and formulation review. The development process starts from idea generation/brainstorming that leads to prototype development. Market research activities such as focus group discussions and product tests are done to ensure we are guided by consumer insights and needs. Product standards and specifications are then established including process parameters, equipment/line efficiencies, packaging studies and shelf-life tests. Every product launched in the market had undergone stringent quality control checks to ensure sensory acceptability, food safety and stability.

Aside from Product development, Packaging also plays a critical role in ensuring safety of our products, hence, the Company hired full-time Packaging Engineers to handle testing of various materials suitable for each product type. Stability tests and shelf-life studies as well as transit tests are part of the total development process. Furthermore, process audits are done to ensure that set standards are strictly being followed, aside from making process improvements for better efficiency.

The Innovation Team, composed of R&D, Marketing and Operations group constantly meet to check project status and monitor deliverables and timelines to ensure flawless execution of new product launches.
We are constantly updated on trends and new technologies to keep us ahead of competition.

The Team conducts regular trade checks for stocks availability and maintain freshness policy.
With reference to regulatory requirements, we have designated personnel doing transactions with the Food and Drug Administration (FDA) to comply with all market requirements, both for local and export markets.

For the last three years, the Company spent about ₱17.8 million in 2019, ₱3.8 million in 2018 and ₱7.1 million in 2017, for research and development.

Employees

As of December 31, 2019, the Company had approximately 473 employees, of which 13 are executives, 45 managers and 113 supervisory staff and 326 were non-supervisory staff. The Company does not anticipate any significant increase in the number of its employees in year 2020.

About 12.88% of the total employees of the Company and its subsidiaries are members of various labor unions. The Company and its subsidiaries have collective bargaining agreements with these unions.

The Company believes that its relationship with its employees is generally good. The Company has not recently experienced any material interruption of operations due to labor disagreements. Labor-Management Councils (LCMs) regularly meet to discuss and resolve work-place issues and production matters.

The employees are covered by retirement plans per division. The plans are trusteed, noncontributory defined benefit pension plan covering substantially all permanent employees of the Company. The Company has no stock option plan.

Working Capital

The Company funds its working capital requirements through internally generated funds and from bank borrowings. The working capital finances the purchase of raw materials, inventory, salaries, administrative expenses, tax payments, and sales receivables until such sales receivables are converted into cash.

Major Business Risks

Like any other business, risks are always considered in the ability or inability to achieve the business objectives and execute strategy effectively. RFM Corporation and its subsidiaries perceive the following business risks:

Financial Risk Management Objectives and Policies

The Group's principal financial instruments include non-derivative instruments such as cash and cash equivalents, short term investments, accounts receivable, accounts payable and accrued liabilities and advances to and from related parties. The main purpose of these financial instruments includes raising funds for the Group's operations and managing identified financial risks. The Group has various other financial assets and financial liabilities such as other current receivables, other current assets and customers' deposits which arise directly from its operations. The main risk arising from the use of financial instruments is credit risk, liquidity risk, interest rate risk and foreign exchange risk.

Credit risk
Credit risk arises from the risk of counterparties defaulting. Management is tasked to minimize credit risk through strict implementation of credit, treasury and financial policies. The Group deals only with reputable counterparties, financial institutions and customers. To the extent possible, the Group obtains collateral to secure sales of its products to customers. In addition, the Group transacts with financial institutions belonging to the top 25% of the industry, and/or those which provide the Group with long-term loans and/or short-term credit facilities.

The Group does not have significant concentrations of credit risk and does not enter into financial instruments to manage credit risk.

The credit quality of financial assets is managed by the Group using internal credit ratings. Credit quality of cash in banks and cash equivalents and AFS financial assets are based on the nature of the counterparty and the Group's internal rating system.

Financial assets that are neither past due nor impaired are classified as "Excellent" account when these are expected to be collected or liquidated on or before their due dates, or upon call by the Group if there are no predetermined defined due dates. All other financial assets that are neither past due or impaired are classified as "Good" accounts.

Liquidity risk
Liquidity risk arises from the possibility that the Group may encounter difficulties in raising fund to meet commitments from financial instruments.

Management is tasked to minimize liquidity risk through prudent financial planning and execution to meet the funding requirements of the various operating divisions within the Group; through long-term and short-term debts obtained from financial institutions; through strict implementation of credit and collection policies, particularly in containing trade receivables; and through capital raising, including equity, as may be necessary. Working capital requirements, on the other hand, are adequately addressed through short-term credit facilities from financial institutions. Trade receivables are kept within manageable levels.

Interest rate risk
The Group's exposure to changes in interest rates relates primarily to the Group's short-term and long-term debt obligations.

Management is tasked to minimize interest rate risk by having a mix of variable and fixed interest rates on its loans. Presently, the Group's short-term and long-term debts and obligations are market-determined, with the long-term debts and obligations interest rates based on PDST-F-1 plus a certain spread.

There is no other impact on the Group's equity other than those affecting the statement of income.

URICI is not expecting significant exposures to interest rate risk considering the short term maturities of its bank loans. There is no impact on the Groups equity other than those affecting the statement of income.

Foreign exchange risk
The Group's exposure to foreign exchange risk results from the Parent Company and URICI's business transactions and financing agreements denominated in foreign currencies.

Management is tasked to minimize foreign exchange risk through the natural hedges arising from its export business and through external currency hedges. Presently, trade importations are immediately paid or converted into Peso obligations as soon as these are negotiated with suppliers. The Group has not done any external currency hedges in 2019 and 2018.

Market risks

Market risks stems from new and/or existing re-launched products and/or new packaging at low prices being introduced in the market place by competitors. To address these competitive pressures, the Company continues to develop new products in innovative packaging formats to keep a hold on its consumers and increase market share. The strategy requires significant resources for market research, product development, and marketing and promotions. Attendant risks are inventory overstocks, spoilage, and warehousing cost if the new product launched in the market fails to take off. To manage these risks the Company has established a system where success indicators in the target market are closely being monitored and supported by effective supply chain management.

Technological changes

RFM Corporation has been in the flour manufacturing for several decades, and its operating mills are older than many of its competitors which have more modern equipment and, thus, better rated operating yields. To meet these challenges, the Company continues to provide sufficient repairs and maintenance on its equipment and continually upgrades sections of its facilities to remain at par with the modern machineries. Recent installations are a Buhler blending system which allowed for more efficiency in product mixing and customization; and a Buhler carousel packing and weighing system provides very accurate weighing of flour in bags. Likewise, in 2017, the Flour group were able to upgrade Mill II to increase production of All Purpose Flour and transfer some of the capacity of Mill 1B for production of pasta flour. In 2018, it upgraded Mill 1B to improve efficiency, yield and flour absorption. In addition, the Company spends in research and development, particularly in the areas of process engineering and wheat mixtures to produce higher flour yields.

In 2008, the Company invested in a new Buhler C-line Pasta Machine to service its growing market in the spaghetti noodles, under the Fiesta brand. The machine incorporates the patented Polymatik Extrusion Technology, which is presently one of the most advanced in raw material mixing processes, and produces pasta that is firmer, brighter, and with excellent heat tolerance. Further expanding the capacity of the pasta line, the Company invested and installed the Pasta Line 3 in 2014. This is to support the growing volume of the Pasta business.

Improvements, upgrades, and regular maintenance and repairs of its Aseptic Production Line allow the Milk and Juice Division to produce good quality ready-to-drink milk and chocolate-flavored milk. Later part of 2016, a new manufacturing line in Stand-Up pouch format for milk was installed, this is to provide new package format for milk in the market. When PET line was discontinued its operations as part of the rationalizing RFM products in the basis of its profitability contributions to the total business, the area where the PET line is located was used to install the Spaghetti Sauce manufacturing lines last 2016. Sauce line capacity has been expanded last 2017 to 3 lines and last 2018 to 4 lines to support the growing market volume.

Technological advances in manufacturing sector contributed to hectic product competition in the market, RFM recognizes the need to update its technology for a more reliable quality and higher productivity. In 2011 and 2012, the Milk and Juice Division invested in improving and replacing its line instrumentation system which resulted to a fast and more accurate product quality monitoring which ensures that every package conforms to the quality standards. In 2013, the Milk and Juice Division production line was transferred to our Laguna factory compound upgrading it production processes through major overhauling of the machineries and installation of new and more efficient utilities. The production facility was rebuilt and upgraded to further improve compliance to the requirements of the Good Manufacturing Practices. The Company invested P150 Million to this transfer and upgrading. On 2017, the major sterilizing equipment for Milk has been replaced with latest equipment which is designed for higher reliability of milk processing.

Collaboration with technical experts in the field of food science and technology as well as manufacturing has been extended to foreign and local business partners to be updated in the latest food trends, equipment and raw materials sourcing. It has its sources of technology information via attendance to seminars, conferences, conventions, journal subscription and internet access to further enhance its research and development skills and manufacturing processes.

Labor

Like other firms in the food and beverage industry, the Company also partakes of the usual risks of labor unrest and strikes.

On 3 September 2018, the Company was impleaded in a complaint filed before the National Labor Relations Commission ("NLRC") NCR, Quezon City by a certain Larry Vic I. Ramos who was an employee of SP Deloraya Job Contracting & Consultancy Services, Inc. ("SP Deloraya"), a third-party contractor which provides manpower services to the Company's Private Label Manufacturing Division. The complainant claimed that he was illegally dismissed and demanded payment of his wages, 13th month pay and regularization, among others. The Company argued that there exists no employer-employee relationship between the complainant and the Company, the complainant being the employee of its co-respondent SP Deloraya. That granting but without conceding that the complainant's abovementioned claims are legitimate, it is the complainant's employer who shall be made answerable to said claims. This being so, the inclusion of the Company and its officers in the case at bar is undoubtedly malicious, tainted with bad faith and misplaced. On 27 December 2018, the Labor Arbiter rendered a decision dismissing the above mentioned complaint, yet holding the Company solidarily liable with SP Deloraya for the payment of Complainant's 13th month pay. Complainant elevated the matter on appeal to the NLRC, which denied the same in a resolution dated 29 March 2019 and in another resolution dated 28 June 2019 denying Complainant's Motion for Reconsideration. On 09 September 2019, Complainant filed a Petition for Certiorari at the Court of Appeals against the resolution of the NLRC. The Company reiterated its arguments that no employer-employee relationship exists between the Company and the Complainant, and alleged the impropriety of the Petition for Certiorari. Considering that the factual findings and decisions of the Labor Arbiter and the NLRC are binding on the higher courts, the resolution of the Petition for Review is expected to be in the Company's favor.

Item 2 – Properties

RFM Corporation owns a flour milling plant with a daily rated capacity of 930 metric tons per day, and is located in Barangay Pineda, Pasig City. A pasta plant with a rated capacity of 3,000 kgs per hour per spaghetti line (2 lines) and 2,450 kgs per hour for macaroni line (1 line) is also located at RFM Pioneer Plant, Barangay Pineda, Pasig City. . A sauce lines (4 lines) located in Cabuyao, Laguna with a rated capacity of 132,000 kilos per day. A milk and juice plant is located in Cabuyao, Laguna, and has a rated capacity of 9.7 million packs per month. The milk and juice Tetra plant currently has five (5) production lines, of which four (4) are owned. Lines are running at 18 hours operation per line for 25 days.

In accordance with various loan agreements, the Company and its subsidiaries are restricted from performing certain corporate acts without the prior approval of the creditors, the more significant of which relate to

entering into a corporate merger or consolidation, acting as guarantor or surety of obligation and acquiring treasury stocks. The Company and its subsidiaries are also required to maintain certain financial ratios. As of December 31, 2019, the why, including its subsidiaries are in compliance with terms and conditions of these agreements.

On July 24, 2019 the BOD approved the declaration of ₱0.0774 regular cash dividend per share or a total of a total of ₱271 million to its stockholders. The dividends were paid on September 4, 2019.

(b.) Dividends Restriction

The Parent Company's retained earnings as of December 31, 2019 is restricted to the extent of the amount of the undistributed equity in net earnings of an associate included in its retained earnings amounting to ₱390.82 million. These will only be available for declaration as dividends when these are actually received.

The long-term loan agreements entered into by RFM Corporation with its creditors allows the Company to declare and pay cash dividends upon compliance with the required current ratio, debt-to-equity ratio and debt service coverage ratio.

Item 6 – Management Discussion and Analysis of Financial Conditions and Results of Operations for Year 2019

Introduction

This discussion summarizes the significant factors affecting the consolidated operating results and financial condition of RFM Corporation and its Subsidiaries for the period December 31, 2019. The following discussion should be read in conjunction with the attached audited consolidated financial statements of the Company as of December 31, 2019 and 2018, and the related consolidated statements of income, changes in stockholders' equity, and cash flows for each of the two years in the period ended December 31, 2019. All necessary adjustments to present the Company's consolidated financial position as of December 31, 2019 and 2018 and the results of operations and cash flow for the years then ended have been made.

Year ended December 31, 2019 vs. 2018

Management Report on Operations

Food and Beverage Company RFM Corporation posted revenue of Php15.33 billion which is 9% higher compared to last year's revenue of Php14.07 billion. This was driven by both Consumer and Institutional segments posting 8% and 11% growth over last year respectively. Group net income for 2019 is at Php1.22 billion or a growth of 11% vs last year.

Financial Position

Analysis of Balance Sheet Accounts

As of December 31, 2019, the Group's total assets increased from last year's billion P16.80 to P18.54 billion due to temporary cash investment amounting to about P2.24billion. The total liabilities increased from last year's P5.1 billion to P6.4 billion due to higher loan and recognition of lease liability.

Year ended December 31, 2018 vs. 2017

Management Report on Operations

Food and Beverage Company RFM Corporation posted revenue of Php14.07 billion which is 10% higher compared to last year's revenue of Php12.74 billion. Resulting net income for 2018 is Php1.107 billion or a growth of 6.0% vs last year.

Financial Position

Analysis of Balance Sheet Accounts

As of December 31, 2018, the Group's total assets increased from last year's P15.92 billion to P16.8 billion due to higher long term investment amounting to about P1.34billion. The total liabilities slightly increased from last year's P4.7 billion to P5.1 billion due to higher advances from related parties.

Key Performance Indicators

For the full fiscal years 2019, 2018 & 2017 the Company's and majority-owned subsidiaries' top five (5) key performance indicators are as follows:

In Millions	**December 2019**	December 2018	December 2017
Revenues	**15,330**	14,071	12,744
Operating Margin	**1,670**	1,459	1,447
Net Income	**1,230**	1,107	1,045
EBITDA	**2,206**	1,971	1,836
Current Ratio	**1.56**	1.43	1.48

(a) Revenue Growth

These indicate external performance of the Company and its subsidiaries in relation to the movement of consumer demand and the competitors' action to the market behavior. These also express market acceptability and room for development and innovations. These are being monitored and compared as a basis for further study and development.

(b) Operating Margin

This shows the result after operating expenses have been deducted. Operating expenses are examined, checked and traced for major expenses. These are being analyzed and compared to budget, and previous years, to ensure prudence and discipline in spending behind marketing and selling activities.

(c) Net Income

This represents the outcome or results of operations. This measures the over-all performance of the team, the consequence of all the contributory factors affecting supply, demand, utilization and decisions.

(d) EBITDA

This measures the Company's ability to generate cash from operation by adding back non-cash expenses (i.e. depreciation and amortization expense) to earnings before interest and tax.

(e) Current Ratio

This determines the company's ability to meet its maturing obligations using its current resources. It indicates the possible tolerable shrinkage in current resources without threat to the claims of current creditors.

Causes for Any Material Changes from Period to Period of FS, which shall include vertical and horizontal analyses of any material item

Please refer to the discussions under Results of Operations and Financial Position for the year ended December 31, 2019 vs. 2018, year ended December 31, 2018 vs. 2017 and year ended December 31, 2017 vs. 2016.

The Company is not aware of the following:

(i) Any events that will trigger direct or contingent financial obligation that is material to the company, including any default or acceleration of an obligation.

(ii) All material off-balance sheet transaction, arrangements, obligations (including contingent obligations), and other relationships of the company with unconsolidated entities or other persons created during the reporting period.

Seasonal Aspects that has Material Effect on the FS

There is no material effect with the seasonal aspect of certain raw materials specifically wheat on the financial statements.

Audit and Audit Related Fees

For the years 2019, 2018 and 2017, the Company engaged the professional services of SGV. The Group incurred an aggregate audit fee of P2.4 million for 2019, excluding out of pocket expenses. The engagement involves the examination of the Company's financial statements in accordance with generally accepted auditing standards. It includes on a test basis review and evaluation of system, documentation and procedures to ascertain that adequate internal controls are in place. Also, they provide updates on latest regulatory or compliance requirement with government agencies such as Securities and Exchange Commission and other government agencies.

The audit committee's approval policies and procedure for external auditors are:

1. Statutory audit of company's annual financial statements

    a. The Audit Committee ensures that the services of the external auditor conform with the provision of the company's manual of corporate governance specifically articles 2.3.4.1; 2.3.4.3 and 2.3.4.4

    b. The Audit Committee makes an assessment of the quality of prior year audit work services, scope, and deliverables and makes a determination of the reasonableness of the audit fee based on the proposed audit plan for the current year.

    c. The Audit Committee approved the final audit plan and scope of audit presented by the external auditor before the conduct of audit. The final audit plan was already the output after the conclusion of the series of pre-audit planning with Management.

    d. The Audit Committee reports to the Board the approved audit plan.

2. For other services other than annual financial statements audit:

    a. The Audit Committee evaluates the necessity of the proposed services presented by Management taking into consideration the following:

        i. The effectiveness of company's internal control and risk management arrangement, systems and procedures, and management degree of compliance.

ii. The effect and impact of new tax and accounting regulations and standards.

iii. Availability of in-house technical expertise.

iv. Cost benefit of the proposed undertaking.

b. The Audit Committee approves and ensures that other services provided by the external auditor shall not be in conflict with the functions of the external auditor for the annual audit of its financial statements.

Item 7 – Financial Statements

The consolidated financial statements and schedules listed are filed as part of previously submitted form 17-A.

Item 8 – Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

There is no event in the past five (5) years wherein the Company had any disagreement with regard to any matter relating to accounting principles or practices, financial statement disclosure or auditing scope or procedure.

The Company regularly adopts New Statement of Financial Accounting Standards (SFAS)/ International Accounting Standards (IAS) where applicable.

PART III - CONTROL ON COMPENSATION AND INFORMATION

RFM CORPORATION

STATEMENT OF MANAGEMENT'S RESPONSIBILITY
FOR CONSOLIDATED COMPANY FINANCIAL STATEMENTS

Securities and Exchange Commission
Secretariat Building, PICC Complex
Roxas Boulevard, Pasay City

The management of RFM Corporation is responsible for the preparation and fair presentation of the consolidated company's financial statements including the schedules attached therein, for the years ended December 31, 2019 and December 31, 2018, in accordance with the Philippine Financial Reporting Standards and for such internal control as management determines is necessary to enable the preparation of consolidated company's financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated company's financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing as applicable matters related to going concern and using the going concern basis of accounting or to cease operations or has no realistic alternative but to do so.

The Board of Directors is responsible for overseeing the Company's financial reporting process.

The Board of Directors reviews and approves the consolidated company's financial statements including the schedules attached therein, and submits the same to the stockholders or members.

SyCip, Gorres Velayo & Co., the independent auditor appointed by the stockholders has audited the consolidated company's financial statements in accordance with Philippine Standards on Auditing, and in its report to the stockholders or members has expressed its opinion on the fairness of presentation upon completion of such audit.

Signed this 1st day of April 2020

INDEPENDENT AUDITOR'S REPORT

The Stockholders and the Board of Directors
RFM Corporation
RFM Corporate Center
Pioneer corner Sheridan Streets
Mandaluyong City

Opinion

We have audited the consolidated financial statements of RFM Corporation and its subsidiaries (the Group), which comprise the consolidated statements of financial position as at December 31, 2019 and 2018, and the consolidated statements of income, consolidated statements of comprehensive income, consolidated statements of changes in equity and consolidated statements of cash flows for each of the three years in the period ended December 31, 2019, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Group as at December 31, 2019 and 2018, and its consolidated financial performance and its consolidated cash flows for each of the three years in the period ended December 31, 2019 in accordance with the financial reporting framework as described in Note 2 to the consolidated financial statements.

Basis for Opinion

We conducted our audits in accordance with Philippine Standards on Auditing (PSAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Consolidated Financial Statements* section of our report. We are independent of the Group in accordance with the Code of Ethics for Professional Accountants in the Philippines (Code of Ethics) together with the ethical requirements that are relevant to our audit of the consolidated financial statements in the Philippines, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For the matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the *Auditor's Responsibilities for the Audit of the Consolidated Financial Statements* section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the consolidated financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying consolidated financial statements.

Impairment testing of trademark with indefinite useful life and goodwill

Under Philippine Financial Reporting Standards, the Group is required to test for impairment the Royal trademark with indefinite useful life and the goodwill from the investment in Unilever-RFM Ice Cream, Inc. on an annual basis. These annual impairment tests are significant to our audit because the carrying value of these intangible assets of ₱2,271.5 million as of December 31, 2019 is material to the consolidated financial statements. In addition, the assessment process requires significant judgment from management because of the use of assumptions and other information, specifically the discount rate, revenue growth rate, royalty savings rate, budgeted brand support and projected operating expenses and maintenance capital expenditures which are affected by future market or economic conditions.

Refer to Notes 2 and 3 to the consolidated financial statements for the relevant accounting policy and discussion of significant judgments and estimates, and Note 13 for the disclosures relating to trademark and goodwill.

Audit Response

We involved our internal specialist in evaluating the management's assessment including the methodologies and the assumptions used in determining the recoverable amounts of the trademark and the goodwill. We compared the key assumptions used such as revenue growth rate, budgeted brand support and projected operating expenses and maintenance capital expenditures against historical performance of the products under the Royal brand and Unilever-RFM Ice Cream, Inc. We also compared the revenue growth rate and the royalty savings rate against relevant published market information. We tested the parameters used in the determination of the discount rate against market data. We likewise reviewed the Group's disclosures about those assumptions to which the outcome of the impairment tests are most sensitive; specifically those that have the most significant effect on the determination of the recoverable amounts of the trademark and the goodwill.

Accounting for the investment in Unilever-RFM Ice Cream, Inc.

The Group has ownership of 50% in Unilever-RFM Ice Cream, Inc. as of December 31, 2019. This investment is accounted for using the proportionate consolidation method as allowed by the Philippine Securities and Exchange Commission. This is a key audit matter because Unilever-RFM Ice Cream, Inc. contributed significantly to the consolidated assets, consolidated liabilities, consolidated revenues and consolidated net income of the Group as of and for the year ended December 31, 2019. In addition, the Group's consolidated assets and consolidated liabilities are significantly affected by the adoption of PFRS 16, *Leases,* given the nature of Unilever-RFM Ice Cream, Inc.'s activities involving high volume of lease agreements covering, among others, depots and fleet cars. Moreover, the adoption of PFRS 16 involves application of significant management judgment and estimation in the determining the lease term, including evaluating whether options to extend or terminate lease are reasonably certain to be exercised and determining the incremental borrowing rate (IBR).

Refer to Note 2 to the consolidated financial statements for the relevant accounting policy, and Notes 11 and 29 for the disclosures relating to the Group's investment in Unilever-RFM Ice Cream, Inc.

Audit Response

We sent instructions to the statutory auditor of Unilever-RFM Ice Cream, Inc. to perform an audit on the financial information of Unilever-RFM Ice Cream, Inc. for the purpose of the Group's consolidated financial statements. These instructions contained a discussion on their scope of work, risk assessment procedures, audit strategy and reporting requirements. We discussed with Unilever-RFM Ice Cream, Inc. statutory auditor about their key audit areas, planning and execution of audit procedures, significant areas of estimation and judgment, and results of their work for the year ended December 31, 2019.

For the adoption of PFRS 16, we reviewed the statutory auditor's working papers and obtained relevant conclusion statements related to their audit procedures which includes the review of (i) the population of the lease agreements covered by PFRS 16 and its underlying contractual terms and conditions, (ii) the determination of the lease term, including any renewal and termination option, (iii) incremental borrowing rate (IBR) used, and (iv) lease calculation, including transition adjustments. In addition, we obtained the calculations made by the Group's management to align the lease adoption policy within the Group. We tested the determination of the IBR by reference to market data as of January 1, 2019. On a sample basis, we tested the computation of the lease liability and the right-of-use assets as of January 1, 2019.

We obtained the financial information of Unilever-RFM Ice Cream, Inc. from its statutory auditor and recomputed the Group's proportionate share in the assets, liabilities and net income of Unilever-RFM Ice Cream, Inc. as of and for the year ended December 31, 2019. We also reviewed the Group's disclosure with respect to its investment in Unilever-RFM Ice Cream, Inc.

Other Information

Management is responsible for the other information. The other information comprises the information included in the SEC Form 20-IS (Definitive Information Statement), SEC Form 17-A and Annual Report for the year ended December 31, 2019 but does not include the consolidated financial statements and our auditor's report thereon. The SEC Form 20-IS (Definitive Information Statement), SEC Form 17-A and Annual Report for the year ended December 31, 2019 are expected to be made available to us after the date of this auditor's report.

Our opinion on the consolidated financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audits of the consolidated financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audits, or otherwise appears to be materially misstated.

Responsibilities of Management and Those Charged with Governance for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with the financial reporting framework as described in Note 2 to the consolidated financial statements, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with PSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with PSAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication

The engagement partner on the audit resulting in this independent auditor's report is Ma. Emilita L. Villanueva.

1. Corporate Information and Authorization for the Issuance of the Consolidated Financial Statements

Corporate Information

RFM Corporation (the Parent Company) was incorporated on August 16, 1957 and registered with the Philippine Securities and Exchange Commission (SEC). On July 9, 2007, the SEC approved the extension of the Company's corporate life from August 22, 2007 to October 13, 2056. The Parent Company is a public company under Section 17.2 of the Securities Regulation Code (SRC) and its shares are listed on the Philippine Stock Exchange (PSE) since 1966. The Parent Company is mainly involved in the manufacturing, processing and selling of wheat, flour and flour products, pasta, milk, juices, margarine, and other food and beverage products. The Parent Company and its subsidiaries are collectively referred to herein as the Group. The principal office address of the Parent Company is RFM Corporate Center, Pioneer corner Sheridan Streets, Mandaluyong City.

Legal Merger

On July 31, 2018, the Board of Directors (BOD) of the Parent Company approved the planned upstream merger among the Parent Company (the Surviving Corporation) and its subsidiaries – Cabuyao Logistics Industrial Center, Inc. (CLIC), Interbake Commissary Corporation (ICC) and Invest Asia Corporation (IAC) (collectively, the Absorbed Corporations) and is seen as desirable and advantageous to the parties and their respective shareholders for the following business reasons:

- The integration of the administrative facilities of the four (4) corporations will result in economies of scale and efficiency of operations;
- The consolidation of assets of the four (4) corporations will allow the procurement of financing and credit facilities under more favorable terms; and,
- The merger will make possible the more productive use of the properties of the constituent corporations.

On January 31, 2019, the Securities and Exchange Commission approved the merger and issued the Certificate of Filing of Articles and Plan of Merger of the Parent Company, CLIC, ICC and IAC (Plan of Merger).

Under the Plan of Merger, the Parent Company will issue 150,617,444 outstanding shares, with ₱1.00 par value to the Absorbed Corporations' shareholders, including the Parent Company, from its unissued shares with average swap ratio of 0.36.

The carrying amount of the identifiable assets and liabilities of the Absorbed Corporations follow:

	As of January 31, 2019 (In Thousands)
ASSETS	
Current assets	
Cash on hand and in banks	₱29,822
Receivables	41,251
Inventories - at cost	1,939
Hold-to-collect investment	19,971
Other current assets	32,585
Total Current Assets	125,568
Noncurrent assets	
Property, plant and equipment	990,703
Deferred tax asset - net	1,676
Other noncurrent assets	1,963
Total Noncurrent Assets	994,342
	₱1,119,910
LIABILITIES AND EQUITY	
Current Liabilities	
Accounts payable and accrued liabilities	₱70,599
Advances from related parties	293,365
Total Current Liabilities	363,964
Noncurrent liabilities	
Retirement benefit liability	3,102
Security deposit	1,930
Deferred income tax liabilities - net	63,954
Total Noncurrent Liabilities	68,986
Total Liabilities	432,950
Total Identifiable Net Assets at Book Value	₱686,962

As a result of merger, the Parent Company acquired the net assets, including previous share of non-controlling interests, and possessed all the right, privileges and immunities of the Absorbed Corporations. All properties and receivables due to the Absorbed Corporations shall be taken and deemed to be transferred to and vested in the Parent Company without further act or deed.

The 146,496,952 number of shares issued by the Parent Company is currently classified as treasury shares. The remaining 4,120,492 shares was issued to the minority shareholders. The difference between the consideration paid by the Parent Company and the share of the non-controlling shareholders in the net assets of the Absorbed Corporations was accounted for as "Equity Reserve" in the consolidated statements of changes in equity for the year ended December 31, 2019. The Group's consolidated financial statements after the merger reflected the balances of the Absorbed Corporations' assets and liabilities at carrying amounts since the event is a common control transaction. The difference between the net assets and related investment in the Absorbed Corporations as of the date of the merger are accounted for as an equity transaction.

Authorization for the Issuance of the Consolidated Financial Statements
The consolidated financial statements of RFM Corporation and its subsidiaries (the Group) as of December 31, 2019 and 2018 and for each of the three years ended December 31, 2019 were authorized for issuance by the Audit Committee on April 7, 2020, as delegated by the Board of Directors (BOD) on February 5, 2020.

2. Summary of Significant Accounting Policies

Basis of Preparation
The consolidated financial statements of the Group have been prepared using the historical cost basis, except for the Group's land, which are stated at appraised values, and net retirement liability which is measured at present value of the defined benefit obligations less fair value of the plan assets. The consolidated financial statements are presented in Philippine Peso (₱), which is the Parent Company's functional currency. All values are rounded off to the nearest thousand pesos (₱000), except for the number of shares or when otherwise indicated.

Statement of Compliance
The consolidated financial statements of the Group have been prepared in compliance with the financial reporting framework as allowed by the SEC which represents Philippine Financial Reporting Standards (PFRSs) except PFRS 11, *Joint Arrangements*, with respect to the Parent Company's investment in Unilever RFM Ice Cream, Inc. (URICI) (see Note 11).

Basis of Consolidation
The consolidated financial statements comprise the financial statements of the Group as of December 31, 2019 and 2018 and for each of the three years in the period ended December 31, 2019.

The consolidated subsidiaries, which are all incorporated in the Philippines, and the effective percentages of ownership as of December 31, 2019 and 2018 are as follows:

		Percentage of Ownership	
Entity	**Nature of Business**	2019	2018
Cabuyao Logistics and Industrial Center, Inc. (CLIC)**	Leasing	–	100.00
RFM Equities, Inc. (REI)	Holding	100.00	100.00
RFM Foods Philippines Corporation (RFM Foods)*	Food retailer	100.00	100.00
Southstar Bottled Water Company, Inc. (Southstar)*	Bottled water business	100.00	100.00
Swift Tuna Corporation (Swift Tuna)*	Manufacturing	100.00	100.00
Interbake Commissary Corporation (ICC)**	Toll processing	–	100.00
Invest Asia Corporation (IAC)**	Leasing	–	96.00
Rizal Lighterage Corporation (RLC)	Barging services	93.51	93.51
FWBC Holdings, Inc.*	Holding company	83.38	83.38
Filipinas Water Bottling Company, Inc. (FWBC)*	Bottled water manufacturing	44.88	44.88
RFM Canning and Marketing, Inc. (RFM Canning)*	Canning services	70.00	70.00
WS Holdings, Inc. (WHI)	Holding company	60.00	60.00

**Dormant*
***Merged entities*

Subsidiaries
Subsidiaries are entities controlled by the Parent Company. The Parent Company controls an investee if, and only, if the Parent Company has:

- Power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee);
- Exposure, or rights, to variable returns from its involvement with the investee; and,
- The ability to use its power over the investee to affect its returns.

When the Parent Company has less than a majority of the voting or similar rights of an investee, the Parent Company considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- The contractual arrangement with the other vote holders of the investee;
- Rights arising from other contractual arrangements; and
- The Parent Company's voting rights and potential voting rights.

The Parent Company re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Parent Company obtains control over the subsidiary and ceases when the Parent Company loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated financial statements from the date the Parent Company gains control until the date the Parent Company ceases to control the subsidiary.

The financial statements of the subsidiaries are prepared for the same reporting period as the Parent Company, using uniform accounting policies for like transactions and other events in similar circumstances. Adjustments where necessary are made to ensure consistency with the policies adopted by the Group.

All intra-group balances, transactions, income and expenses, and profits and losses resulting from intra-group transactions are eliminated in full. However, intra-group losses are also eliminated but are considered an impairment indicator of the assets transferred.

A change in the ownership interest in a subsidiary, without a loss of control, is accounted for as an equity transaction.

If the Parent Company loses control over a subsidiary, it:

- Derecognizes the carrying amounts of the assets (including goodwill) and liabilities of the subsidiary;
- Derecognizes the carrying amount of any non-controlling interests;
- Recognizes the fair value of the consideration received;
- Recognizes the fair value of any investment retained;
- Recognizes any surplus or deficit in profit or loss; and
- Reclassifies the Parent Company's share of components previously recognized in consolidated statement of comprehensive income to consolidated statement of income or retained earnings, as appropriate, as would be required if the Parent Company had directly disposed of the related assets or liabilities.

Non-controlling interests
Non-controlling interests represent the portion of equity in a subsidiary not attributable, directly of indirectly, to the Parent Company. Profit or loss and each component of other comprehensive income (OCI) are attributed to the equity holders of the Parent Company and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. Non-controlling interest are presented separately in the consolidated statement of income, consolidated statement of comprehensive income and within the equity section of consolidated statement of financial position and consolidated statement of changes in equity, separately from the equity attributable to equity holders of the Parent Company.

A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction. If the Group loses control over a subsidiary, it derecognizes assets (including goodwill) and liabilities of the subsidiary, the carrying amount of any non-controlling interest and the cumulative translation differences recorded in equity; recognizes the fair value of the consideration received, the fair value of any investment retained, and any retained earnings or deficit in consolidated statement of income; and reclassifies the parent's share of components previously recognized in OCI to profit or loss or retained earnings, as appropriate.

Changes in Accounting Policies
The accounting policies adopted are consistent with those of the previous financial year, except that the Group has adopted the following new accounting pronouncements starting January 1, 2019. Adoption of these pronouncements did not have any significant impact on the Group's financial position or performance unless otherwise indicated.

- PFRS 16, *Leases*

  PFRS 16 supersedes PAS 17, *Leases*, Philippine Interpretation IFRIC 4, *Determining whether an Arrangement contains a Lease*, Philippine Interpretation SIC-15, *Operating Leases-Incentives and Philippine Interpretation SIC-27, Evaluating the Substance of Transactions Involving the Legal Form of a Lease.* The standard sets out the principles for the recognition, measurement, presentation and disclosure of leases and requires lessees to recognize most leases on the balance sheet.

  Lessor accounting under PFRS 16 is substantially unchanged from its accounting under PAS 17. Lessors will continue to classify all leases using the same classification principle as in PAS 17 and distinguish between two types of leases: operating and finance leases. Therefore, PFRS 16 did not have an impact for leases where the Group is the lessor.

  The Group adopted PFRS 16 using the modified retrospective approach upon adoption of PFRS 16 in 2019 and elects to apply the standard to contracts that were previously identified as leases applying PAS 17. The Group will therefore not apply the standard to contracts that were not previously identified as containing a lease applying PAS 17.

The effect of adoption PFRS 16 as at January 1, 2019 follow:

	Increase/ (Decrease) *(in thousands)*
Consolidated statement of financial position	
Assets	
Right-of-use (ROU) assets (included under 'Property, plant and equipment')	₱441,171
Deferred tax asset	24,383
Liabilities	
Lease liabilities	522,449
Total adjustment on equity:	
Retained earnings	(56,894)

The Group and URICI have lease contracts for various items of warehouses, depots and fleet cars. Before the adoption of PFRS 16, the Group classified each of its leases (as lessee) at the inception date as either a finance lease or an operating lease. For the accounting policy applied prior to January 1, 2019, refer to "Summary of significant accounting policies" section.

Upon adoption of PFRS 16, the Group applied a single recognition and measurement approach for all leases except for short-term leases and leases of low-value assets. Refer to "Summary of significant accounting policies" section or the accounting policy beginning January 1, 2019.

Leases previously accounted for as operating leases
The Group recognized right-of-use assets and lease liabilities for those leases previously classified as operating leases, except for short-term leases and leases of low-value assets. The right-of-use assets were recognized based on the carrying amount as if the standard had always been applied, apart from the use of incremental borrowing rate at the date of initial application. Lease liabilities were recognized based on the present value of the remaining lease payments, discounted using the incremental borrowing rate at the date of initial application.

The Group also applied the available practical expedients wherein it:
- Applied the short-term leases exemptions to leases with lease term that ends within 12 months of the date of initial application
- Excluded the initial direct costs from the measurement of the right-of-use asset at the date of initial application
- Used hindsight in determining the lease term where the contract contained options to extend or terminate the lease

Based on the above, as at January 1, 2019:
- Property and equipment were recognized amounting to ₱441.17 million representing the amount of right-of-use assets set up on transition date.
- Additional lease liabilities of ₱522.45 million were recognized.
- Deferred tax asset increased by ₱24.38 million because of the deferred tax impact of the changes in assets and liabilities.
- The net effect of these adjustments had been adjusted to retained earnings amounting to ₱56.89 million.

As at January 1, 2019, the weighted average incremental borrowing rate applied by the Group to the lease liabilities ranges from 7.35% to 7.44%. The lease liabilities as at January 1, 2019 can be reconciled to the operating lease commitments as of December 31, 2018 as follows:

	Increase/(Decrease) *(in thousand pesos)*
Operating lease commitments as at December 31, 2018	₱1,234,335
Commitments relating to:	
Leases of short-term and low-value assets	364,458
Renewal periods not included in operating lease commitments as at December 31, 2018	66,785
Total gross lease payments as of January 1, 2019	803,092
Weighted average incremental borrowing rate at January 1, 2019	7.35% to 7.44%
Lease liabilities recognized at January 1, 2019	₱522,449

Due to the adoption of PFRS 16, the Group's operating profit in 2019 will improve, while its interest expense will increase. This is due to the change in the accounting for rent expense related to leases that were classified as operating leases under PAS 17.

The adoption of PFRS 16 will have an impact on equity in 2019 amounting to ₱56.89 million, since the Group elected to measure the right-of-use assets at an amount as if the standard had always been applied, apart from the use of incremental borrowing rate at the date of initial application.

- Philippine Interpretation IFRIC-23, *Uncertainty over Income Tax Treatments*
  The interpretation addresses the accounting for income taxes when tax treatments involve uncertainty that affects the application of PAS 12, *Income Taxes*, and does not apply to taxes or levies outside the scope of PAS 12, nor does it specifically include requirements relating to interest and penalties associated with uncertain tax treatments.

  The interpretation specifically addresses the following:

  - Whether the Group considers uncertain tax treatments separately
  - The assumptions the Group makes about the examination of tax treatments by taxation authorities
  - How the Group determines taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates; and
  - How an entity considers changes in facts and circumstances

  The Group determines whether to consider each uncertain tax treatment separately or together with one or more other uncertain tax treatments and use the approach that better predicts the resolution of the uncertainty. The Group assumes that the taxation authority will examine amounts that it has a right to examine and have full knowledge of all related information when making those examinations. If the Group concludes that it is not probable that the taxation authority will accept an uncertain tax treatment, the Group shall reflect the effect of the uncertainty for each uncertain tax treatment using the method the Group expects to better predict the resolution of the uncertainty.

  Upon adoption of the Interpretation, the Group has assessed whether it has any uncertain tax position and applies significant judgment in identifying uncertainties over its income tax treatments. Based on its assessment, the Group determined that it is probable that its income tax treatments (including those for the subsidiaries) will be accepted by the taxation authorities.

Accordingly, the Interpretation did not have significant impact on the consolidated financial statements of the Group.

- Amendments to PFRS 9, *Prepayment Features with Negative Compensation*

  Under PFRS 9, a debt instrument can be measured at amortized cost or at fair value through other comprehensive income, provided that the contractual cash flows are 'solely payments of principal and interest on the principal amount outstanding' (the SPPI criterion) and the instrument is held within the appropriate business model for that classification. The amendments to PFRS 9 clarify that a financial asset passes the SPPI criterion regardless of the event or circumstance that causes the early termination of the contract and irrespective of which party pays or receives reasonable compensation for the early termination of the contract.

  These amendments had no impact on the consolidated financial statements of the Group.

- Amendments to PAS 19, *Employee Benefits, Plan Amendment, Curtailment or Settlement*

  The amendments to PAS 19 address the accounting when a plan amendment, curtailment or settlement occurs during a reporting period. The amendments specify that when a plan amendment, curtailment or settlement occurs during the annual reporting period, an entity is required to:

  - Determine current service cost for the remainder of the period after the plan amendment, curtailment or settlement, using the actuarial assumptions used to remeasure the net defined benefit liability (asset) reflecting the benefits offered under the plan and the plan assets after that event

  - Determine net interest for the remainder of the period after the plan amendment, curtailment or settlement using: the net defined benefit liability (asset) reflecting the benefits offered under the plan and the plan assets after that event; and the discount rate used to remeasure that net defined benefit liability (asset).

  The amendments also clarify that an entity first determines any past service cost, or a gain or loss on settlement, without considering the effect of the asset ceiling. This amount is recognized in profit or loss. An entity then determines the effect of the asset ceiling after the plan amendment, curtailment or settlement. Any change in that effect, excluding amounts included in the net interest, is recognized in other comprehensive income.

  The amendments had no impact on the consolidated financial statements of the Group as it did not have any plan amendments, curtailments, or settlements during the period.

- Amendments to PAS 28, *Long-term Interests in Associates and Joint Ventures*

  The amendments clarify that an entity applies PFRS 9 to long-term interests in an associate or joint venture to which the equity method is not applied but that, in substance, form part of the net investment in the associate or joint venture (long-term interests). This clarification is relevant because it implies that the expected credit loss model in PFRS 9 applies to such long-term interests.

  The amendments also clarified that, in applying PFRS 9, an entity does not take account of any losses of the associate or joint venture, or any impairment losses on the net investment, recognized as adjustments to the net investment in the associate or joint venture that arise from applying PAS 28, *Investments in Associates and Joint Ventures*.

These amendments had no impact on the consolidated financial statements as the Group does not have long-term interests in its associate and joint venture.

- *Annual Improvements to PFRSs* 2015-2017 Cycle
  - Amendments to PFRS 3, *Business Combinations,* and PFRS 11, *Joint Arrangements*, *Previously Held Interest in a Joint Operation*

    The amendments clarify that, when an entity obtains control of a business that is a joint operation, it applies the requirements for a business combination achieved in stages, including remeasuring previously held interests in the assets and liabilities of the joint operation at fair value. In doing so, the acquirer remeasures its entire previously held interest in the joint operation.

    A party that participates in, but does not have joint control of, a joint operation might obtain joint control of the joint operation in which the activity of the joint operation constitutes a business as defined in PFRS 3. The amendments clarify that the previously held interests in that joint operation are not remeasured.

    An entity applies those amendments to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after January 1, 2019 and to transactions in which it obtains joint control on or after the beginning of the first annual reporting period beginning on or after January 1, 2019, with early application permitted. These amendments had no impact on the consolidated financial statements of the Group as there is no transaction where joint control is obtained.

  - Amendments to PAS 12, *Income Tax Consequences of Payments on Financial Instruments Classified as Equity*

    The amendments clarify that the income tax consequences of dividends are linked more directly to past transactions or events that generated distributable profits than to distributions to owners. Therefore, an entity recognizes the income tax consequences of dividends in profit or loss, other comprehensive income or equity according to where the entity originally recognized those past transactions or events.

    An entity applies those amendments for annual reporting periods beginning on or after January 1, 2019, with early application is permitted. These amendments had no impact on the consolidated financial statements of the Group because dividends declared by the Group do not give rise to tax obligations under the current tax laws.

  - *Amendments* to PAS 23, *Borrowing Costs, Borrowing Costs Eligible for Capitalization*

    The amendments clarify that an entity treats as part of general borrowings any borrowing originally made to develop a qualifying asset when substantially all of the activities necessary to prepare that asset for its intended use or sale are complete.

    An entity applies those amendments to borrowing costs incurred on or after the beginning of the annual reporting period in which the entity first applies those amendments. An entity applies those amendments for annual reporting periods beginning on or after January 1, 2019, with early application permitted.

    Since the Group has not made any borrowings to develop a qualifying asset, this amendments has no impact on the consolidated financial statements.

Standards Issued but not yet Effective

Pronouncements issued but not yet effective are listed below. Unless otherwise indicated, the Group does not expect that the future adoption of the said pronouncements to have a significant impact on its consolidated financial statements. The Group intends to adopt the following pronouncements when they become effective.

Effective beginning on or after January 1, 2020

- Amendments to PFRS 3, *Definition of a Business*

  The amendments to PFRS 3 clarify the minimum requirements to be a business, remove the assessment of a market participant's ability to replace missing elements, and narrow the definition of outputs. The amendments also add guidance to assess whether an acquired process is substantive and add illustrative examples. An optional fair value concentration test is introduced which permits a simplified assessment of whether an acquired set of activities and assets is not a business.

  An entity applies those amendments prospectively for annual reporting periods beginning on or after January 1, 2020, with earlier application permitted.

  These amendments will apply on future business combinations of the Group.

- Amendments to PAS 1, *Presentation of Financial Statements*, and PAS 8, *Accounting Policies, Changes in Accounting Estimates and Errors*, *Definition of Material*

  The amendments refine the definition of material in PAS 1 and align the definitions used across PFRSs and other pronouncements. They are intended to improve the understanding of the existing requirements rather than to significantly impact an entity's materiality judgements.

  An entity applies those amendments prospectively for annual reporting periods beginning on or after January 1, 2020, with earlier application permitted.

Effective beginning on or after January 1, 2021

- PFRS 17, *Insurance Contracts*

  PFRS 17 is a comprehensive new accounting standard for insurance contracts covering recognition and measurement, presentation and disclosure. Once effective, PFRS 17 will replace PFRS 4, *Insurance Contracts*. This new standard on insurance contracts applies to all types of insurance contracts (i.e., life, non-life, direct insurance and re-insurance), regardless of the type of entities that issue them, as well as to certain guarantees and financial instruments with discretionary participation features. A few scope exceptions will apply.

  The overall objective of PFRS 17 is to provide an accounting model for insurance contracts that is more useful and consistent for insurers. In contrast to the requirements in PFRS 4, which are largely based on grandfathering previous local accounting policies, PFRS 17 provides a comprehensive model for insurance contracts, covering all relevant accounting aspects. The core of PFRS 17 is the general model, supplemented by:
  - A specific adaptation for contracts with direct participation features (the variable fee approach)
  - A simplified approach (the premium allocation approach) mainly for short-duration contracts

  PFRS 17 is effective for reporting periods beginning on or after January 1, 2023, with comparative figures required. Early application is permitted.

Deferred effectivity

- Amendments to PFRS 10, *Consolidated Financial Statements*, and PAS 28, *Sale or Contribution of Assets between an Investor and its Associate or Joint Venture*

  The amendments address the conflict between PFRS 10 and PAS 28 in dealing with the loss of control of a subsidiary that is sold or contributed to an associate or joint venture. The amendments clarify that a full gain or loss is recognized when a transfer to an associate or joint venture involves a business as defined in PFRS 3. Any gain or loss resulting from the sale or contribution of assets that does not constitute a business, however, is recognized only to the extent of unrelated investors' interests in the associate or joint venture.

  On January 13, 2016, the Financial Reporting Standards Council deferred the original effective date of January 1, 2016 of the said amendments until the International Accounting Standards Board (IASB) completes its broader review of the research project on equity accounting that may result in the simplification of accounting for such transactions and of other aspects of accounting for associates and joint ventures.

The Group continues to assess the impact of the above new and amended accounting standards and Interpretations effective subsequent to 2019 on the Group's consolidated financial statements in the period of initial application. Additional disclosures required by these amendments will be included in the consolidated financial statements when these amendments are adopted.

Summary of Significant Accounting Policies

Current versus Noncurrent Classification
The Group presents assets and liabilities in the consolidated statement of financial position based on current or noncurrent classification.

An asset is current when it is:

a. Expected to be realized or intended to be sold or consumed in normal operating cycle;
b. Held primarily for the purpose of trading;
c. Expected to be realized within twelve months after the reporting period; or
d. Cash or cash equivalent, unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

The Group classifies all other assets, including deferred taxes, as noncurrent

A liability is current when:

a. It is expected to be settled in normal operating cycle;
b. It is held primarily for the purpose of trading;
c. It is due to be settled within twelve months after the reporting period; or
d. There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

The Group classifies all other liabilities, including deferred taxes, as noncurrent.

Fair Value Measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible to the Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the consolidated financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognized in the consolidated financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorization (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

At each reporting date, management analyzes the movements in the values of assets and liabilities which are required to be re-measured or re-assessed per the Group's accounting policies. For this analysis, management verifies the major inputs applied in the latest valuation by agreeing the information in the valuation computation to contracts and other relevant documents.

For the purpose of fair value disclosures, the Group has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

Cash and Cash Equivalents

Cash includes cash on hand and in banks. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash with original maturities of three months or less from dates of acquisition and which are subject to an insignificant risk of changes in value.

Short-term Cash Investments

Short-term cash investments are short term placements with maturities of three months but less than one year from date of acquisition. The Group earns interest at the respective short-term deposit rates.

Financial Instruments (before January 1, 2018)

Date of recognition
The Group recognizes a financial asset or a financial liability in the consolidated statement of financial position when it becomes a party to the contractual provisions of the instrument. Purchases or sales of financial assets that require delivery of assets within the time frame by regulation or convention in the marketplace are recognized on the settlement date.

Initial recognition and classification of financial instruments
All financial assets and financial liabilities are recognized initially at fair value. Except for financial assets at fair value through profit or loss (FVPL), the initial measurement of financial assets includes transaction costs.

The Group's financial assets are classified into the following categories: financial assets at FVPL, loans and receivables, held-to-maturity (HTM) investments and available-for-sale (AFS) investments. The Group also classifies its financial liabilities as financial liabilities at FVPL and other financial liabilities. The classification depends on the purpose for which the investments were acquired or whether they are quoted in an active market.

The Group determines the classification of its financial assets and financial liabilities at initial recognition and where allowed and appropriate, re-evaluates such designation at each reporting date.

Financial instruments are classified as a liability or equity in accordance with the substance of the contractual arrangement. Interest, dividends, gains and losses relating to a financial instrument or a component that is a financial liability, are reported as expense or income. Distributions to holders of financial instruments classified as equity are charged directly to equity, net of any related income tax benefits.

"Day 1" difference
Where the transaction price in a non-active market is different than the fair value from other observable current market transactions of the same instrument or based on a valuation technique whose variables include only data from observable market, the Group recognizes the difference between the transaction price and fair value (a "Day 1" difference) in profit or loss unless it qualifies for recognition as some other type of asset or liability. In cases where use is made of data which is not observable, the difference between the transaction price and model value is only recognized in profit or loss when the inputs become observable or when the instrument is derecognized. For each transaction, the Group determines the appropriate method of recognizing the "Day 1" difference amount.

Loans and receivables
Loans and receivables are nonderivative financial assets with fixed or determinable payments that are not quoted in an active market. After initial measurement, loans and receivables are subsequently carried at amortized cost using the effective interest rate (EIR) method less any allowance for impairment. Amortized cost is calculated taking into account any discount or premium on acquisition and includes fees that are integral part of the EIR and transaction costs. Gains and losses are recognized in the consolidated statement of income when the loans and receivables are derecognized or impaired, as well as through the amortization process.

The Group's loans and receivables include cash and cash equivalents, short-term cash investments, trade receivables, nontrade receivables, advances to related parties and other receivables.

HTM Investments
HTM investments are quoted non-derivative financial assets with fixed or determinable payments and fixed maturities and which investments the Group has the positive intention and ability to hold them to maturity. After initial measurement, HTM investments are measured at amortized cost using the EIR method, less impairment. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included as interest income in the consolidated statement of income. The losses arising from impairment are recognized in the consolidated statement of income in finance costs.

The Group's investment in bonds is classified under this category.

Embedded derivatives
Derivatives embedded in host contracts are accounted for as separate derivatives and recorded at fair value if their economic characteristics and risks are not closely related to those of the host contracts and the host contracts are not held for trading or designated at fair value through profit or loss. These embedded derivatives are measured at fair value with changes in fair value recognized in profit or loss. In measuring the embedded derivatives, the Group takes into account the probability that the conditions (e.g., event of default) triggering the exercise of the derivatives will happen in the future. Reassessment only occurs if there is either a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required or a reclassification of a financial asset out of the fair value through profit or loss category.

Other financial liabilities
This category pertains to financial liabilities that are not held for trading or not designated as FVPL upon the inception of the liability. Other financial liabilities are initially recognized at fair value and are subsequently carried at amortized cost, taking into account the impact of applying the EIR method of amortization (or accretion) for any related premium, discount and any directly attributable transaction costs.

The Group's other financial liabilities include bank loans and accounts payable and other current liabilities (excluding payables to government agencies).

Impairment of Financial Assets
The Group assesses at each reporting date whether a financial asset or group of financial assets is impaired.

Loans and receivables. The Group first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, or collectively for financial assets that are not individually significant. If there is objective evidence that an impairment loss on loans and receivables carried at amortized cost has been incurred, the amount of loss is measured as a difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original EIR (i.e., the EIR computed at initial recognition). The carrying amount of the asset shall be reduced through the use of an allowance account. The amount of loss is recognized in profit or loss.

In relation to receivables, a provision for impairment is made when there is objective evidence (such as the probability of insolvency or significant financial difficulties of the debtor) that the Group will not be able to collect all of the amounts due under the original terms of the invoice. Impaired loans and receivables carried at amortized cost are derecognized when they are assessed as uncollectible either as a direct reduction of the carrying amount or through use of an allowance account when impairment has been previously recognized in the said amount.

Financial Instruments (after January 1, 2018)

Date of recognition
The Group recognizes a financial asset or a financial liability in the consolidated statement of financial position when it becomes a party to the contractual provisions of the instrument. Purchases and sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the market place are recognized on the settlement date.

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity. The Group's financial assets and financial liabilities consist of amortized cost and other financial liabilities.

Initial recognition and measurement of financial assets
The Group classifies financial assets, at initial recognition, as subsequently measured at amortized cost, fair value through OCI, and fair value through profit or loss.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them. With the exception of trade and other receivables that do not contain a significant financing component or for which the Group has applied the practical expedient, the Group initially measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs. Trade and other receivables that do not contain a significant financing component or for which the Group has applied the practical expedient are measured at the transaction price determined under PFRS 15.

For a financial asset to be classified and measured at amortized cost or fair value through OCI, it needs to give rise to cash flows that are 'solely payments of principal and interest (SPPI)' on the principal amount outstanding. This assessment is referred to as the SPPI test and is performed at an instrument level.

The Group's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both.

Subsequent measurement of financial assets
For purposes of subsequent measurement, financial assets are classified in four categories:

- Financial assets at amortized cost
- Financial assets at fair value through profit or loss (FVTPL)
- Financial assets at fair value through OCI with recycling of cumulative gains and losses
- Financial assets designated at fair value through OCI with no recycling of cumulative gains and losses upon derecognition

As of December 31, 2019 and 2018, the Group's financial assets consist only of financial assets at amortized cost.

Financial assets at amortized cost
This category is the most relevant to the Group. The Group measures financial assets at amortized cost if both of the following conditions are met:

- The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows; and

- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at amortized cost are subsequently measured using the effective interest (EIR) method, less any impairment in value. Gains and losses are recognized in profit or loss when the asset is derecognized, modified or impaired.

Under PFRS 9, embedded derivatives are no longer separated from a host financial asset. Instead, financial assets are classified based on the business model and their contractual terms.

As of December 31, 2019 and 2018, the Group's financial assets at amortized cost include cash and cash equivalents, short-term cash investments, trade receivables, nontrade receivables, advances to related parties, hold-to-collect investments and other receivables.

Initial recognition and measurement of financial liabilities
Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognized initially at fair value and, in the case of other financial liabilities, net of directly attributable transaction costs. As of December 31, 2019 and 2018, the Group's financial liabilities include bank loans and accounts payable and other current liabilities (excluding payables to government agencies).

Subsequent measurement - other financial liabilities
This category pertains to financial liabilities that are not held for trading or not designated as at FVTPL upon the inception of the liability. These include liabilities arising from operations. These financial liabilities are recognized initially at fair value and are subsequently carried at amortized cost, taking into account the impact of applying the EIR method of amortization (or accretion) for any related premium, discount and any directly attributable transaction cost.

Reclassifications of Financial Instruments
The Group reclassifies its financial assets when, and only when, there is a change in the business model for managing the financial assets. Reclassifications shall be applied prospectively by the Group and any previously recognized gains, losses or interest shall not be restated. The Group does not reclassify its financial liabilities.

Impairment of Financial Assets
The Group recognizes an allowance for expected credit losses (ECLs) for all debt instruments not held at fair value through profit or loss. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Group expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

For cash and cash equivalents, short-term cash investments and HTC investments, the Group applies the low credit risk simplification. The probability of default and loss given defaults are publicly available and are considered to be low credit risk investments. It is the Group's policy to measure ECLs on such instruments on a 12-month basis. However, when there has been a significant increase in credit risk since origination, the allowance will be based on the lifetime ECL. The Group uses the ratings from Standard and Poor's and Moody's to determine whether the debt instrument has significantly increased in credit risk and to estimate ECLs. The Group considers a debt investment

security to have a low credit risk when its credit risk rating is equivalent to the globally understood definition of 'investment grade'.

For trade receivables, the Group applies a simplified approach in calculating ECLs. Therefore, the Group does not track changes in credit risk, but instead recognizes a loss allowance based on lifetime ECLs at each reporting date. The Group has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

The key inputs in the model include the Group's definition of default and historical data of three years for the origination, maturity date and default date. The Group considers trade receivables in default when contractual payments are already past due for a certain number of days, which depends on the normal customer arrangements and business terms and varies across relevant business segment/sub-segment of the Group, ranging from 90 days to 360 days, except for certain circumstances when the reason for being past due is due to reconciliation with customers of payment records which are administrative in nature which may extend the definition of default. However, in certain cases, the Group may also consider trade receivables to be in default when internal or external information indicates that the Group is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Group.

For nontrade and other receivables and advances to related parties, ECLs are recognized in two stages. For credit exposures for which there has not been a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12-months (a 12-month ECL). For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL).

Financial assets are credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of those financial assets have occurred. For these credit exposures, lifetime ECLs are also recognized and interest revenue is calculated by applying the credit-adjusted effective interest rate to the amortized cost of the financial asset.

Determining the stage for impairment
At each reporting date, the Group assesses whether there has been a significant increase in credit risk for financial assets since initial recognition by comparing the risk of default occurring over the expected life between the reporting date and the date of initial recognition. The Group considers reasonable and supportable information that is relevant and available without undue cost or effort for this purpose. This includes quantitative and qualitative information and forward-looking analysis.

Exposures that have not deteriorated significantly since origination, or where the deterioration remains within the Group's investment grade criteria are considered to have a low credit risk. The provision for credit losses for these financial assets is based on a 12-month ECL. The low credit risk exemption has been applied on debt investments that meet the investment grade criteria of the Group from the time of origination. An exposure will migrate through the ECL stages as asset quality deteriorates. If, in a subsequent period, asset quality improves and also reverses any previously assessed significant increase in credit risk since origination, then the loss allowance measurement reverts from lifetime ECL to 12-months ECL.

This policy is applicable to Group's financial assets except for trade receivables, for which the Group applies a simplified approach in calculating ECLs. Therefore, the Group does not track changes in credit risk, but instead recognizes a loss allowance based on lifetime ECLs at each reporting date.

Write-off policy
The Group writes-off a financial asset, in whole or in part, when the asset is considered uncollectible, it has exhausted all practical recovery efforts and has concluded that it has no reasonable expectations of recovering the financial asset in its entirety or a portion thereof.

Derecognition of Financial Assets and Financial Liabilities (effective for all periods presented)

Financial asset
A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognized when:

- the Group's right to receive cash flows from the asset has expired; or
- the Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred or retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

Where the Group has transferred its right to receive cash flows from an asset or has entered into a "pass-through" arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the Group continues to recognize the transferred asset to the extent of the Group's continuing involvement. In that case, the Group also recognizes an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

Financial liabilities
A financial liability is derecognized when the obligation under the liability is discharged, cancelled or has expired. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in the consolidated statement of income.

Offsetting Financial Instruments (effective for all periods presented)
Financial assets and financial liabilities are offset and the net amount reported in the consolidated statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously. The Group assesses that it has a currently enforceable right of offset if the right is not contingent on a future event, and is legally enforceable in the normal course of business, event of default, and event of insolvency or bankruptcy of the Group and all of the counterparties.

Inventories
Inventories are valued at the lower of cost and net realizable value (NRV). Costs incurred in bringing the product to its present location and condition are accounted for as follows:

Finished goods	-	determined using the moving average method; cost includes direct materials, direct labor and a proportion of manufacturing overhead costs based on normal operating capacity.
Goods in process	-	applicable allocation of fixed and variable overhead costs.
Raw materials, spare parts and supplies	-	purchase cost using the moving average method.

NRV of finished goods and goods in process is the estimated selling price in the ordinary course of business, less the estimated costs of completion and the estimated costs necessary to make the sale. For raw materials, NRV is the current replacement cost. In case of spare parts and supplies, NRV is the estimated realizable value of the inventories when disposed of at their condition at the reporting date. An allowance for inventory obsolescence is provided for slow-moving, obsolete, defective and damaged inventories based on physical inspection and management evaluation.

Other Current Assets
Other current assets include prepaid expenses, deposit on purchases of inventories, tax credits and input VAT.

Prepaid expenses. These are expenses paid in advance and recorded as asset before they are utilized. Prepaid expenses that are expected to be realized for no more than 12 months after the reporting date are classified as current assets; otherwise, these are classified as other noncurrent assets.

Deposit on purchases of inventories. This account comprises of advance payments to suppliers for payments on goods to be purchased in connection with the Group's operations. These are reclassified as part of inventory upon delivery of the related asset.

Value-added Tax (VAT). Revenues, expenses, and assets are recognized net of the amount of VAT, if applicable. When VAT from sales of goods and/or services (output VAT) exceeds VAT passed on from purchases of goods or services (input VAT), the excess is recognized as payable in the statement of financial position. When VAT passed on from purchases of goods or services (input VAT) exceeds VAT from sales of goods and/or services (output VAT), the excess is recognized as an asset in the consolidated statement of financial position to the extent of the recoverable amount.

Other Noncurrent Assets
Other noncurrent assets include security deposits and deposit on purchases of property, plant and equipment.

Deposit on purchases of property plant and equipment. This account comprises of advance payments to contractors for the construction and development of property, plant, and equipment. These are reclassified as part of property, plant and equipment upon the completion or delivery of the related asset.

Effective January 1, 2019
Property, Plant and Equipment
Effective January 1, 2019, it is the Group's policy to classify ROU assets as part of property and equipment. Prior to that date, all of the Group's leases are accounted for as operating leases in accordance with PAS 17, hence, not recorded on the consolidated statement of financial position. The Group recognizes ROU assets at the commencement date of the lease (i.e., the date the underlying asset

is available for use). ROU assets are initially measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The initial cost of ROU assets includes the amount of lease liabilities recognized, lease payments made at or before the commencement date less any lease incentives received and estimate of costs to be incurred by the lessee in dismantling and removing the underlying asset, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease, unless those costs are incurred to produce inventories.

Unless the Group is reasonably certain to obtain ownership of the leased asset at the end of the lease term, the recognized ROU assets are depreciated on a straight-line basis over the shorter of their estimated useful life and lease term, as follows:

	Number of Years
ROU assets - Land and Warehouses	2 to 30
ROU assets - Plant and Equipment	1 to 5

ROU assets are subject to impairment.

Effective for all periods presented
Property, Plant and Equipment
Property, plant and equipment, except land, are stated at cost less accumulated depreciation, and any impairment in value. The initial cost of items of property, plant and equipment consists of its purchase price, including import duties and any directly attributable costs of bringing the asset to its working condition and location for its intended use. Expenditures incurred after the property, plant and equipment have been put into operation, such as repairs and maintenance and overhaul costs, are normally charged to the consolidated statement of income in the period the costs are incurred. In situations where it can be clearly demonstrated that the expenditures have resulted in an increase in the future economic benefits expected to be obtained from the use of an item of property, plant and equipment beyond its originally assessed standard of performance, the expenditures are capitalized as an additional cost of the item of property, plant and equipment.

Land is stated at appraised value based on a valuation performed by an independent firm of appraisers. The increase in the valuation of land is credited to "Revaluation increment on land" account, net of deferred income tax effect, and presented under the equity section of the consolidated statement of financial position.

Revaluation of land is made periodically such that the carrying amount does not differ materially from that which would be determined using the fair value at the reporting date. For subsequent revaluations, any resulting increase in the assets' carrying amount as a result of the revaluation is credited to "Revaluation increment on land" account, net of deferred income tax effect, in the consolidated statement of comprehensive income. Any resulting decrease is directly charged against any related revaluation increment to the extent that the decrease does not exceed the amount of the revaluation increment in respect of the same assets. In case the land is disposed of, the related revaluation increment is transferred directly to retained earnings. Transfers from revaluation increment to retained earnings are not made through the consolidated statement of income.

Depreciation is computed on a straight-line basis over the estimated useful lives of the assets as follows:

	Number of Years
Land improvements	5 to 20
Silos, buildings and improvements	5 to 30
Machinery and equipment	5 to 25
Office furniture and fixtures	2 to 10
Transportation and delivery equipment	5

Leasehold improvements recognized under "Silos, buildings and improvements" are depreciated over the life of the assets or the lease term, whichever is shorter.

Construction in progress are properties in the course of construction for production, rental or administrative purposes, or for purposes not yet determined, which are carried at cost less any recognized impairment loss. Construction in progress are reclassified into appropriate class of property, plant and equipment when the relevant assets are completed and available for use.

Depreciation and amortization of an item of property, plant and equipment begins when it becomes available for use, i.e., when it is in the location and condition necessary for it to be capable of operating in the manner intended by management. Depreciation and amortization cease at the earlier of the date that the item is classified as held for sale (or included in a disposal group that is classified as held for sale) and the date the asset is derecognized.

The estimated useful lives and depreciation and amortization method are reviewed periodically to ensure that the periods and method of depreciation and amortization are consistent with the expected pattern of economic benefits from items of property, plant and equipment.

Property, plant and equipment are derecognized when either these are disposed of or when these are permanently withdrawn from use and there are no more future economic benefits expected from its use or disposal.

Intangible Assets

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is their fair value at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and accumulated impairment losses. Internally generated intangible assets, excluding capitalized development costs, are not capitalized and expenditure is reflected in the consolidated statement of income in the year in which the expenditure is incurred.

The estimated useful lives of intangible assets are assessed as either finite or indefinite.

Intangible assets with finite lives (e.g., computer software) are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and the amortization method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortization period or method, as appropriate, and are treated as changes in accounting estimates. The amortization expense on intangible assets with finite lives is recognized in the consolidated statement of income in the expense category that is consistent with the function of the intangible assets.

Intangible assets with indefinite useful lives such as trademark and goodwill are not amortized, but are tested for impairment annually. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on a prospective basis.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the consolidated statement of income when the asset is derecognized.

As of December 31, 2019 and 2018, the Group's intangible assets consist of trademark with indefinite useful life and computer software that is amortized over three years using the straight-line method.

Business Combination and Goodwill

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred, measured at acquisition date fair value, and the amount of any non-controlling interest in the acquiree. For each business combination, the acquirer measures the non-controlling interest in the acquiree either at fair value or at the proportionate share of the acquiree's identifiable net assets. Acquisition-related costs are expensed as incurred and included in general and administrative expenses.

When the Group acquires a business, it assesses the financial assets and financial liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts by the acquiree.

If the business combination is achieved in stages, the acquisition date fair value of the acquirer's previously held equity interest in the acquiree is remeasured to fair value at the acquisition date and any gain or loss on remeasurement is recognized in the consolidated statement of income.

Any contingent consideration to be transferred by the acquirer will be recognized at fair value, at the acquisition date. Contingent consideration classified as equity is not remeasured and its subsequent settlement is accounted for within equity. Contingent consideration classified as an asset or liability that is a financial instrument and within the scope of PFRS 9 (or PAS 39 if prior to January 1, 2018) is measured at fair value with the changes in fair value recognized in the statement of profit or loss in accordance with PFRS 9 (or PAS 39 if prior to January 1, 2018). Other contingent consideration that is not within the scope of PFRS 9 is measured at fair value at each reporting date with changes in fair value recognized in profit or loss.

Goodwill is initially measured at cost being the excess of the aggregate of the consideration transferred and the amount recognized for non-controlling interest over the net identifiable assets acquired and liabilities assumed. If this consideration is lower than the fair value of the net assets of the subsidiary acquired, the difference is recognized in the consolidated statement of income.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash-generating units (CGU), or group of CGUs that are expected to benefit from the synergies of the combination, irrespective of whether other assets or liabilities of the Group are assigned to those units or group of units.

Goodwill is reviewed for impairment, annually or more frequently if events or changes in circumstances indicate that the carrying value may be impaired. Impairment is determined for goodwill by assessing the recoverable amount of the CGU or group of CGUs to which the goodwill relates. Where the

recoverable amount of the CGU or group of CGUs is less than the carrying amount of the CGU or group of CGUs to which goodwill has been allocated, an impairment loss is recognized. Impairment losses relating to goodwill cannot be reversed in future periods. The Group performs its impairment test of goodwill annually every reporting date.

Where goodwill forms part of a CGU and part of the operation within that unit is disposed of, the goodwill associated with the operation disposed of is included in the carrying amount of the operation when determining the gain or loss on disposal of the operation. Goodwill disposed of in this circumstance is measured based on the relative values of the operation disposed of and the portion of the CGU retained.

Borrowing Costs

Borrowing costs are capitalized if they are directly attributable to the acquisition or construction of a qualifying asset. The capitalization of borrowing costs:

(i) commences when the activities to prepare the assets are in progress and expenditures and borrowing costs are being incurred;
(ii) is suspended during the extended periods in which active development, improvement and construction of the assets are interrupted; and
(iii) ceases when substantially all the activities necessary to prepare the assets are completed.

Where funds are borrowed specifically to finance a project, the amount capitalized represents actual borrowing costs incurred less any investment income on the temporary investment of the borrowed funds. Where the funds used to finance a project form part of general borrowings, the amount capitalized is determined by applying the capitalization rate to the expenditures on the asset. The amount of capitalized borrowing cost, though, cannot exceed the actual borrowing cost incurred during the period.

Other borrowing costs are recognized as an expense in the period in which they are incurred.

Investments in Joint Ventures and Associate

A joint venture is a type of joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint venture. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control.

An associate is an entity over which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but is not control or joint control over those policies. The considerations made in determining significant influence or joint control are similar to those necessary to determine control over subsidiaries (e.g., contractual arrangements, voting rights and potential voting rights).

The Group's investments in joint venture and associate are accounted for using the equity method except for its investment in URICI, a joint venture, which is accounted for using the proportionate consolidation method as permitted by the SEC. This method involves consolidating a proportionate share of the joint venture's assets, liabilities, income and expenses with similar items in the Group's consolidated financial statements on a line-by-line basis.

Under the equity method, the investment in an associate or a joint venture is initially recognized at cost. The carrying amount of the investment is adjusted to recognize changes in the Group's share of net assets of the associate or joint venture since the acquisition date. Goodwill relating to the associate or

joint venture is included in the carrying amount of the investment and is neither amortized nor individually tested for impairment.

The consolidated statement of income reflects the Group's share of the financial performance of the associate or joint venture. Any change in OCI of those investees is presented as part of the Group's OCI. In addition, when there has been a change recognized directly in the equity of the associate or joint venture, the Group recognizes its share of any changes, when applicable, in the consolidated statement of changes in equity. Unrealized gains and losses resulting from transactions between the Group and the associate or joint venture are eliminated to the extent of the interest in the associate or joint venture.

The aggregate of the Group's share of profit or loss of an associate and a joint venture is shown on the face of the consolidated statement of income under "Other income (charges)" and represents profit or loss after tax and non-controlling interests in the subsidiaries of the associate or joint venture.

The financial statements of the associate or joint venture are prepared for the same reporting period as the Group. When necessary, adjustments are made to bring the accounting policies in line with those of the Group.

After application of the equity method, the Group determines whether it is necessary to recognize an impairment loss on its investment in an associate and joint ventures. At each reporting date, the Group determines whether there is objective evidence that the investments in the associate and joint venture are impaired. If there is such evidence, the Group calculates the amount of impairment as the difference between the recoverable amount of the associate or joint venture and its carrying value, then recognizes the loss in the consolidated statement of income.

Upon loss of significant influence over the associate or joint control over the joint venture, the Group measures and recognizes any retained investment at its fair value. Any difference between the carrying amount of the associate or joint venture upon loss of significant influence or joint control and the fair value of the retained investment and proceeds from disposal is recognized in the consolidated statement of income.

Impairment of Noncurrent Nonfinancial Assets

The carrying values of property, plant and equipment, and intangible assets (except trademark) are reviewed for impairment when event or changes in circumstances indicate that the carrying values may not be recoverable.

Trademark and goodwill are tested for impairment at least annually or when there is an identified indicator of impairment.

If any such indication exists or where the carrying value exceeds the recoverable amount, the asset is written down to its recoverable amount. For an asset that does not generate largely independent cash inflows, the recoverable amount is determined for the CGU to which the asset belongs.

The recoverable amount of an asset or CGU is the greater of fair value less costs of disposal and value-in-use. In assessing value-in-use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the future cash flow estimates have not been adjusted. Impairment losses, if any, are recognized in the consolidated statement of income in those expense categories consistent with the function of the impaired asset.

For assets excluding goodwill, an assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated. A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. If that is the case, the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depreciation and amortization, had no impairment loss been recognized for the asset in prior years. Such reversal is recognized in the consolidated statement of income unless the asset is carried at revalued amount, in which case the reversal is treated as revaluation increase. After such a reversal, the depreciation and amortization charge is adjusted in future periods to allocate the asset's revised carrying amount, less any residual value, on a systematic basis over its remaining useful life.

Equity

Capital Stock

Capital stock is stated at par value for all shares issued and outstanding. When the Parent Company issues more than one class of stock, a separate account is maintained for each class of stock and the number of shares issued.

When the shares are sold at a premium, the difference between the proceeds and the par value is credited to the "Additional paid-in capital" account. Direct costs incurred related to equity issuance, such as underwriting, accounting and legal fees, printing costs and taxes are charged to the "Additional paid-in capital" account. When shares are issued for a consideration other than cash, the proceeds are measured by the fair value of the consideration received. In case shares are issued to extinguish or to settle the liability of the Group, the share shall be measured at either the fair value of the shares issued or fair value of the liability settled, whichever is more reliably determinable.

Treasury Stock

Own equity instruments which are reacquired (treasury stock) are recognized at cost and deducted from equity. No gain or loss is recognized in the consolidated statement of income on the purchase, sale, issue or cancellation of the Group's own equity instruments. Any difference between the carrying value and the consideration, if reissued, is recognized in the "Additional paid-in capital" account. The cost of treasury stock sold or cancelled is determined on a first-in, first-out basis.

When the shares are retired, the capital stock account is reduced by its par value, and the excess of cost over par value upon retirement is debited to "Additional paid-in capital" to the extent of the specific or average additional paid-in capital when the shares were issued and to the retained earnings for the remaining balance.

Equity Reserve

Equity reserve include effect of merger with subsidiaries with non-controlling interest and the Parent Company. Equity reserve is derecognized when the subsidiary is deconsolidated, which is the date on which control ceases.

Retained Earnings

Retained earnings represent the cumulative balance of periodic net income or loss, dividend distribution, effect of changes in accounting policy and other capital adjustments.

Dividends on Common Shares

Cash and property dividends on common shares are recognized as liability and deducted from equity when approved and declared by the BOD of the Parent Company. Stock dividends are treated as

transfers from retained earnings to paid-in capital stock when approved and declared by the BOD and the stockholders representing at least two-thirds of the outstanding capital stock.

Dividends for the year that are approved after the reporting date are dealt with as an event after the reporting period.

Earnings per Share (EPS)
Basic EPS is computed by dividing net income for the year attributable to equity holders of the Group by the weighted average number of common shares issued and outstanding during the year.

Diluted EPS is calculated in the same manner, adjusted for the effects of any potential dilutive common shares. Where the effect of the potential dilutive common shares would be anti-dilutive, basic and diluted earnings per share are stated at the same amount.

The Group does not have potential dilutive common shares in 2019 and 2018.

Revenue Recognition (before to January 1, 2018)
Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the amount of revenue can be reliably measured. Revenue is measured at the fair value of the consideration received or receivable excluding discounts, returns and value-added taxes (VAT). The following specific recognition criteria must also be met before revenue is recognized:

Sale of goods (Manufacturing)
Revenue from sale of goods shown as "Net sales" is recognized, net of applicable discounts, when the significant risks and rewards of ownership of the goods have passed to the buyer and there is actual delivery made and the same is accepted by the buyer.

Sale of services (Service)
Revenue is recognized upon performance of services in accordance with the substance of the relevant agreements.

Revenue Recognition (after January 1, 2018)

Revenue from Contracts with Customers
The Group primarily derives its revenue from the sale of goods and rendering of services from manufacturing and service operations, respectively. Revenue from contracts with customers is recognized when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Group expects to be entitled in exchange for those goods or services.

The Group has concluded that it is acting as principal in all of its revenue arrangements because the Group is the primary obligor who is responsible for delivering the goods and providing the services to the customers and the Group bears the credit risk.

The following specific recognition criteria must also be met before revenue is recognized.

Sale of goods (Manufacturing)
The Group enters into a contract with customer through an approved purchased order which constitute a valid contract as specific details such as the quantity, price, contract terms and their respective obligations are clearly identified in the contract.

Revenue from sale of goods is recognized at a point in time generally, on the time of delivery of the goods to the customer except for institutional division sales of flour and buns, which are recognized at the time the goods are dispatched from the warehouses.

Revenue recognized comprises of the invoice price of goods delivered after the deduction of estimated variable considerations and considerations paid/payable to customers. Variable considerations such as discounts, rebates, returns, sales incentives, and other adjustments are provided for in the period the related sales are recorded. Accumulated experience is used to estimate the provision for discounts, using the most likely amount method; revenue is only recognized to the extent that it is highly probable a significant reversal will not occur.

Sale of services (Service)
Revenue, net of any incentives, is generally recognized over the time the services since as the entity performs, the customer simultaneously receives and consumes the benefits provided by the performance. The Company has determined that the output method used faithfully depicts the performance of the services.

Revenue not in scope under PFRS 15

Rent
Rent income is recognized on a straight-line basis over the terms of the lease.

Interest and financing income
Interest income is recognized as the interest accrues using the EIR method.

Dividend income
Dividend income on investments in shares of stock is recognized when the Group's right to receive the payment is established, which is the date when the dividend declaration is approved by the investee's BOD and/or the stockholders.

Cost of Goods Sold
Cost of goods sold is recognized when the related goods are sold.

Selling and Marketing and General and Administrative Expenses
Selling and marketing expenses are costs incurred to sell or distribute the goods. It includes export and documentation processing and delivery, among others. General and administrative expenses constitute costs of administering the business. These are expensed as incurred.

Short-term Employee Benefits
Short-term employee benefits include salaries and wages, vacation leave and sick leave benefits and other benefits that are expected to be settled wholly before 12 months after the end of the reporting period in which the employees render the related services. These are recognized in the consolidated statements of income in the appropriate expense categories.

Retirement Benefits
The net defined benefit liability or asset is the aggregate of the present value of the defined benefit obligation at the end of the reporting period reduced by the fair value of plan assets (if any), adjusted for any effect of limiting a net defined benefit asset to the asset ceiling. The asset ceiling is the present value of any economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

The cost of providing benefits under the defined benefit plans is actuarially determined using the projected unit credit method.

Defined benefits costs comprise the following:
- Service cost
- Net interest on the net defined benefit liability or asset
- Re-measurements of net defined benefit liability or asset

Service costs which include current service costs, past service costs and gains or losses on non-routine settlements are recognized as expense in profit or loss. Past service costs are recognized when plan amendment or curtailment occurs. These amounts are calculated periodically by independent qualified actuaries.

Net interest on the net defined benefit liability or asset is the change during the period in the net defined benefit liability or asset that arises from the passage of time which is determined by applying the discount rate based on government bonds to the net defined benefit liability or asset. Net interest on the net defined benefit liability or asset is recognized as expense or income in the consolidated statement of income.

Re-measurements comprising actuarial gains and losses, return on plan assets and any change in the effect of the asset ceiling (excluding net interest on defined benefit liability) are recognized in other comprehensive income and transferred to retained earnings in the period in which they arise. Re-measurements are not reclassified to the consolidated statement of income in subsequent periods.

Plan assets are assets that are held by a long-term employee benefit fund. Fair value of plan assets is based on market price information. Plan assets are not available to the creditors of the Group, nor can they be paid directly to the Group. When no market price is available, the fair value of plan assets is estimated by discounting expected future cash flows using a discount rate that reflects both the risk associated with the plan assets and the maturity or expected disposal date of those assets (or, if they have no maturity, the expected period until the settlement of the related obligations). If the fair value of the plan assets is higher than the present value of the defined benefit obligation, the measurement of the resulting defined benefit asset is limited to the present value of economic benefits available in the form of refunds from the plan or reductions in future contributions to the plan.

Leases

Policies applicable effective January 1, 2019

The Group determines at contract inception whether a contract is, or contains, a lease by assessing whether the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

The Group as a lessee

Lease liabilities

At the commencement date of the lease, the Group recognizes lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for terminating a lease, if the lease term reflects the Group exercising the option to terminate. The variable lease payments that do not depend on an index or a rate are recognized as expense in the period on which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Group uses the incremental borrowing rate at the lease commencement date if the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the in-substance fixed lease payments or a change in the assessment to purchase the underlying asset.

Short-term leases and leases of low-value assets
The Group applies the short-term lease recognition exemption to its short-term leases (i.e., those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the leases of low-value assets recognition exemption to its leases of other equipment that are considered of low value. Lease payments on short-term leases and leases of low-value assets are recognized as expense on a straight-line basis over the lease term.

Applicable to all periods presented
The Group as lessor
Leases where the Group does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. Rental income arising is accounted for on a straight-line basis over the lease terms and is included in revenue in the statement of income due to its operating nature. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognized over the lease term on the same basis as rental income. Contingent rents are recognized as revenue in the period in which they are earned.

Effective prior to January 1, 2019
The determination of whether an arrangement is, or contains a lease is based on the substance of the arrangement and requires an assessment of whether the fulfillment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset. A reassessment is made after inception of the lease only if one of the following applies:

a. There is a change in contractual terms, other than a renewal or extension of the arrangement;
b. A renewal option is exercised or extension granted, unless the term of the renewal or extension was initially included in the lease term;
c. There is a change in the determination of whether fulfillment is dependent on a specified asset; or
d. There is a substantial change to the asset.

Where reassessment is made, lease accounting shall commence or cease from the date when the change in circumstances gave rise to the reassessment of scenarios (a), (c) or (d) and the date of renewal or extension period for scenario (b).

The Group as lessee
Leases where the lessor retains substantially all the risks and benefits of ownership of the asset are classified as operating leases. Operating leases are recognized as an expense in the consolidated statement of income on a straight-line basis over the lease term.

Income Taxes
Current income tax
Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used as basis to compute the amount are those that have been enacted or substantively enacted at the reporting date.

Deferred income tax
Deferred income tax is provided, using the liability method, on all temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred income tax liabilities are recognized for all taxable temporary differences. Deferred income tax assets are recognized for all deductible temporary differences and carryforward benefits of unused tax credit from excess of minimum corporate income tax (MCIT) over regular corporate income tax (RCIT) [excess MCIT], and unused net operating loss carryover (NOLCO), to the extent that it is probable that sufficient future taxable profits will be available against which the deductible temporary differences and carryforward benefits of unused excess MCIT and NOLCO can be utilized.

The carrying amount of deferred income tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient future taxable profits will be available to allow all or part of the deferred income tax assets to be utilized. Unrecognized deferred income tax assets are reassessed at each reporting date and are recognized to the extent that it has become probable that sufficient future taxable profits will allow the deferred income tax asset to be recovered.

Deferred income tax assets and deferred income tax liabilities are measured at the tax rates that are expected to apply to the year when the asset is realized or the liability is settled, based on tax rates and tax laws that have been enacted or substantively enacted at the reporting date.

Deferred income tax relating to items recognized outside the consolidated statement of income is recognized in correlation to the underlying transaction either in other comprehensive income or directly in equity.

Deferred income tax assets and deferred income tax liabilities are offset, if a legally enforceable right exists to offset current income tax assets against current income tax liabilities and the deferred income taxes relate to the same taxable entity and the same taxation authority.

Value-added Tax (VAT)
Revenues, expenses, and assets are recognized net of the amount of VAT, if applicable.

When VAT from sales of goods and/or services (output VAT) exceeds VAT passed on from purchases of goods or services (input VAT), the excess is recognized as payable in the consolidated statement of financial position. When VAT passed on from purchases of goods or services (input VAT) exceeds VAT from sales of goods and/or services (output VAT), the excess is recognized as an asset in the consolidated statement of financial position to the extent of the recoverable amount.

Segment Reporting
The Group's operating businesses are organized and managed separately according to the nature of the products provided, with each segment representing a strategic business unit that offers different products and serves different markets.

Foreign Currency-Denominated Transactions and Translations
Transactions denominated in foreign currencies are recorded using the functional currency exchange rate at the date of the transaction. Outstanding monetary assets and liabilities denominated in foreign currencies are translated using the closing exchange rate at the reporting date. All differences are taken to the consolidated statement of income. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions.

Provision and Contingencies
Provisions are recognized when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable (i.e., more likely than not) that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. Provisions are reviewed at each reporting date and adjusted to reflect the current best estimate. The expense relating to any provision is presented in the parent company statement of income, net of reimbursement. If the effect of the time value of money is material, provisions are discounted using the current pre-tax rate that reflects, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as interest expense.

Contingent liabilities are not recognized in the consolidated financial statements but are disclosed in the notes to the consolidated financial statements unless the outflow of resources embodying economic benefits is remote. Contingent assets are not recognized in the consolidated financial statements but are disclosed in the notes to the consolidated financial statements when an inflow of economic benefits is probable.

Events After the Reporting Date
Events after the reporting date that provide additional information about the Group's position at the reporting date (adjusting events) are reflected in the consolidated financial statements. Events after the reporting date that are not adjusting events are disclosed in the notes to consolidated financial statement when material.

3. Management's Use of Significant Accounting Estimates and Assumptions

The preparation of the consolidated financial statements in compliance with PFRS requires the Group to exercise judgment, make accounting estimates and use assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. The judgments, estimates and assumptions are based on management's evaluation of relevant facts and circumstances as of the date of the consolidated financial statements. Actual results could differ from the estimates and assumptions used. The effect of any change in estimates or assumptions is reflected in the consolidated financial statements when they become reasonably determinable.

Judgment
In the process of applying the Group's accounting policies, management has made the following judgments, apart from those involving estimations, which have the most significant effect on the amounts recognized in the consolidated financial statements.

Determination of useful life of trademark
The assessment of indefinite useful life is reviewed annually to determine whether the indefinite useful life continues to be appropriate. When there are events that indicate that the indefinite useful life assessment is no longer appropriate, the useful life assessment will be changed from indefinite to finite.

Based on analysis of relevant factors indicated below, management has assessed that there is no foreseeable limit to the period over which the trademark is expected to generate cash inflows for the Group:

- Management does not expect to encounter significant difficulties in renewing the registration of the trademark.

- Management has assessed that the cost of renewing the trademark as insignificant when compared with the economic benefits expected to flow to the Group from the continued use of the trademark.
- Management is committed to continue to invest for the long term to extend the period over which the trademark is expected to continue to provide economic benefits.

Consequently, management assessed that the trademark has an indefinite useful life as of December 31, 2019 and 2018.

Determination of lease term of contracts with renewal and termination options - Group as a lessee - PFRS 16 (applicable effective January 1, 2019)
The Group has lease contracts that include extension and termination options. The Group applies judgment in evaluating whether it is reasonably certain whether or not to exercise the option to renew or terminate the lease. That is, it considers all relevant factors that create an economic incentive for it to exercise either the renewal or termination. After the commencement date, the Group reassesses the lease term if there is a significant event or change in circumstances that is within its control and affects its ability to exercise or not to exercise the option to renew or to terminate (e.g., construction of significant leasehold improvements).

Refer to Note 29 for information on potential future rental payments relating to periods following the exercise date of extension and termination options that are not included in the lease term.

Distinction between Investment Properties and Owner-occupied Properties
The Group determines whether a property qualifies as an investment property. In making its judgment, the Group considers whether the property generates cash flows largely independent of the other assets held by an entity. Owner-occupied properties generate cash flows that are attributable not only to property but also to the other assets used in the production or supply process.

Some properties comprise a portion that is held to earn rentals or for capital appreciation and another portion that is held for use in the production or supply of goods or services or for administrative purposes. If these portions cannot be sold separately, the property is accounted for as an investment property only if an insignificant portion is held for use in the production or supply of goods or services or for administrative purposes. Judgment is applied in determining whether ancillary services are so significant that a property does not qualify as investment property. The Group considers each property separately in making its judgment.

Management assessed that the Group's properties are mostly owner-occupied properties and are therefore classified as part of property, plant and equipment as of December 31, 2019 and 2018.

Definition of Default and Credit-impaired Financial Assets (upon the adoption of PFRS 9)
The Group defines a financial instrument as in default, which is fully aligned with the definition of credit-impaired, when contractual payments are already past due for a certain number of days, which depends on the normal customer arrangements and business terms and varies across relevant business segment/sub-segment of the Group, ranging from 90 days to 360 days. However, in certain cases, the Group may also consider a financial asset to be in default when internal or external information indicates that the Group is unlikely to receive the outstanding contractual amounts in full. The criteria above have been applied to all financial assets measured at amortized cost held by the Group and are consistent with the definition of default used for internal credit risk management purposes. The default definition has been applied consistently to calculate the Group's expected loss. An instrument is considered to be no longer in default (i.e. to have cured) when it no longer meets any of the default criteria.

Simplified approach for trade receivables (upon the adoption of PFRS 9)
The Group uses a provision matrix to calculate ECLs for trade receivables. The provision rates are based on days past due for groupings of various customer accounts that have similar loss patterns (i.e., by segment and customer type). The provision matrix is initially based on the Group's historical observed default rates. The Group calibrates the matrices to adjust the historical credit loss experience with forward-looking information. At every reporting date, the historical observed default rates are updated and changes in the forward-looking estimates are analyzed.

Use of Macro-economic Forecasts and Incorporation of Forward-looking Information. (upon the adoption of PFRS 9)
Macro-economic forecasts are determined by evaluating a range of possible outcomes and using reasonable and supportable information that is available without undue cost and effort at the reporting date about past events, current conditions and forecasts of future economic conditions. The Group takes into consideration using different macro-economic variables to ensure linear relationship between internal rates and outside factors. Regression analysis was used to objectively determine which variables to use.

Predictive relationship between the key indicators and default and loss rates on various portfolios of financial assets have been developed based on analyzing historical data over the past 3 years. The methodologies and assumptions including any forecasts of future economic conditions are reviewed regularly.

Macro-economic indicators that are considered relevant to the Group include, but not limited to, changes in inflation, consumer price index, gross domestic product and commodity prices.

Grouping of instruments for losses measured on collective basis.
For expected credit loss provisions modelled on a collective basis, a grouping of exposures is performed on the basis of shared risk characteristics, such that risk exposures within a group are homogeneous. The Group considers in its collective assessment based on its business segments and type of customers. The appropriateness of groupings is monitored and reviewed on a periodic basis by Group. As of December 31, 2019 and 2018, the total gross carrying amount of trade receivables for which lifetime ECLs have been measured on a collective basis amounted to ₱2,033 million and ₱2,117 million, respectively (see Note 6).

Revenue recognition on sale of goods
The Group's main revenue source is its sale of goods. Revenue recognition under PFRS 15 involves the Group's application of significant judgment and estimation in the: (a) identification of the contract for sale of goods that would meet the requirements of PFRS 15; (b) assessment of performance obligation and the probability that the entity will collect the consideration from the customer; (c) determining method to estimate variable consideration and assessing the constraint; and (c) recognition of revenue as the Group satisfies the performance obligation.

a) *Existence of a contract*
The Group's primary document for a contract with a customer is an approved purchased order with terms clearly identified including the product specification and payment terms and, for some customer groups, with a signed marketing and distributorship agreement. Each party's rights regarding the goods to be transferred is clearly identified including the product specification, quantity and payment terms. In addition, part of the assessment process of the Group before revenue recognition is to assess the probability that the Group will collect the consideration to which it will be entitled in exchange for the goods sold that will be transferred to the customer.

b) *Identifying performance obligation*
The Group identifies performance obligations by considering whether the promised goods or services in the contract are distinct goods or services. A good or service is distinct when the customer can benefit from the good or service on its own or together with other resources that are readily available to the customer and the Group's promise to transfer the good or service to the customer is separately identifiable from the other promises in the contract. The Group undertakes to sell the products specified including its quantity indicated in an approved purchased order. This is considered as one performance obligation.

c) *Recognition of revenue as the Group satisfies the performance obligation.*
The Group recognizes its revenue for all revenue streams at a point in time, where the goods are sold and delivered, except for flour sales which are recognized at the time the goods are dispatched from the warehouse.

Operating lease commitments - the Group as lessee – effective prior to January 1, 2019
The Group has various lease agreements comprising land, warehouse/buildings, and equipment. Based on an evaluation of the terms and conditions of the arrangements, management has assessed that there is no transfer of ownership of the properties by the end of the lease term and the lease term is not a major part of the economic life of the properties. Thus, the Group accounted for the lease agreements as operating leases (see Note 29).

Estimates and Assumptions
The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below.

Impairment of trademark, goodwill and property, plant and equipment
The Group reviews for impairment the carrying value of trademark, goodwill and property, plant and equipment annually or more frequently if events or changes in circumstances indicate that the carrying value may be impaired. The Group performs impairment test of trademark, goodwill and property, plant and equipment annually every reporting period.

For purposes of impairment testing of trademark and property, plant and equipment, the most appropriate valuation approach used is based on the circumstances relevant to the Group and based on the extent of available information. The Group determined that the recoverable amount of the trademark with infinite useful life is fair value less cost of disposal. The fair value of the trademark was calculated using relief from royalty method that considers revenue growth rates, budgeted brand support and royalty savings arising from the ownership of the trademark. Management assessed that the costs of disposal, which mainly pertain to the cost of transferring the certificate of registration with the Intellectual Property Office and documentary stamp tax, to be insignificant. The key assumptions used to determine the fair value are further discussed in Note 13.

Impairment is determined for goodwill by assessing the recoverable amount of the CGU or group of CGUs to which the goodwill relates. The Group determined that the recoverable amount of the goodwill is value-in-use. Value-in-use calculation is based on a discounted cash flow model. The recoverable amount is sensitive to the discount rate used and the expected future cash in-flows and the growth rates. Assessments require the use of estimates and assumptions such as discount rates and operating expense. If the recoverable amount of the unit exceeds the carrying amount of the CGU, the CGU and the goodwill allocated to that CGU shall be regarded as not impaired. Where the recoverable amount of the CGU or group of CGUs is less than the carrying amount of the CGU or group of CGUs to which goodwill has been allocated, an impairment loss is recognized. The key assumptions used to determine the recoverable amount are further discussed in Note 13.

No impairment losses were recognized for trademark and goodwill in 2019, 2018 and 2017 (see Note 13).

For property, plant and equipment, the Group assesses impairment on the assets whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. The factors that the Group considers important which could trigger an impairment review include the following:

- Significant underperformance relative to expected historical or projected future operating results;
- Significant changes in the manner of use of the acquired assets or the strategy for overall business; and
- Significant negative industry or economic trends.

An impairment loss is recognized whenever the carrying amount of an asset exceeds its recoverable amount. The estimated recoverable amount is the higher of an asset's fair value less costs to sell and value in use. The fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction while value in use is the present value of estimated future cash flows expected to arise from the continuing use of an asset and from its disposal at the end of its useful life. Recoverable amounts are estimated for individual assets or, if it is not possible, for the cash-generating unit to which the asset belongs. For impairment loss on specific assets, the estimated recoverable amount represents the net fair value less costs to sell.

No impairment losses were recognized in 2019 and 2017. In 2018, impairment loss in its property, plant and equipment amounting to ₱0.43 million (see Note 12).

Leases - Estimating the Incremental Borrowing Rate – effective January 1, 2019
The Group cannot readily determine the interest rate implicit in the lease, therefore, it uses its IBR to measure lease liabilities. The IBR is the rate of interest that the Group would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment. The IBR therefore reflects what the Group 'would have to pay', which requires estimation when no observable rates are available or when they need to be adjusted to reflect the terms and conditions of the lease. The Group estimates the IBR using observable inputs (such as risk-free interest rates) when available and is required to make certain entity-specific estimates (such as the Group's stand-alone credit risk rating).

The Group's lease liabilities amounted to ₱499.52 million as of December 31, 2019 (see Note 29).

Estimation of allowance for doubtful accounts (prior to adoption of PFRS 9)
The Group maintains allowance for doubtful accounts based on the results of the individual and collective assessments. Under the individual assessment, the Group is required to obtain the present value of estimated cash flows using the receivable's original EIR. Impairment loss is determined as the difference between the receivable's carrying balance and the computed present value. If no future cash flows is expected, impairment loss is equal to the carrying balance of the receivables. Factors considered in individual assessment would require the Group to classify its receivables based on the credit characteristics (customer type, payment history, past due status and term) of the customers. Impairment loss is then determined based on the historical loss experience of the receivables grouped per credit risk profile.

Refer to Note 6 for the carrying value of the receivables and allowance for doubtful accounts.

Estimation of expected credit losses.
ECLs are derived from unbiased and probability-weighted estimates of expected loss, and are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Group expects to receive, discounted at the original effective interest rate, or an approximation thereof. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

Refer to Note 6 for the ECL recognized on the Group's receivables.

Estimation of variable consideration and assessing the constraint
The Group offers sales incentives through various programs to customers. Such sales incentives include customer rebates, price reductions, performance incentives, among others. The extent and mode of such arrangements vary across different segments of the Group. Such incentives give rise to variable consideration. In estimating the variable consideration, the Group is required to use either the expected value method or the most likely amount method based on which method better predicts the amount of consideration to which it will be entitled.

The Group determined that the most likely amount method is the appropriate method to use in estimation since the Group's contracts only include a single volume threshold (i.e., has only two possible outcomes, either the entity achieves a performance target or does not).

Before including any amount of variable consideration in the transaction price, the Group considers whether the amount of variable consideration is constrained. The Group determined that the estimates of variable consideration are constrained based on its historical experience, business forecast and the current economic conditions. In addition, the uncertainty on the variable consideration will be resolved within a short time frame.

Determination of NRV of inventories
The Group's estimates of the NRV of inventories are based on the most reliable evidence available at the time the estimates are made, of the amount that the inventories are expected to be realized. These estimates consider the fluctuations of price or cost directly relating to events occurring after the end of the period to the extent that such events confirm conditions existing at the end of the period. A new assessment is made at NRV in each subsequent period. When the circumstances that previously caused inventories to be written down below cost no longer exist or when there is a clear evidence of an increase in NRV because of change in economic circumstances, the amount of the write-down is reversed so that the new carrying amount is the lower of the cost and the revised NRV.

The carrying values of the Group's inventories amounted to ₱1,485.15 million and ₱1,242.33 million as of December 31, 2019 and 2018, respectively (see Note 7).

Estimation of useful lives of property, plant and equipment (excluding ROU assets)
The Group estimates the useful lives of depreciable property, plant and equipment based on a collective assessment of similar businesses, internal technical evaluation and experience with similar assets. Estimated useful lives are based on the periods over which the assets are expected to be available for use. The estimated useful lives are reviewed periodically and are updated if expectations differ from previous estimates due to physical wear and tear, technical and commercial obsolescence and legal or other limits on the use of the assets. It is possible, however, that future results of operations could be materially affected by changes in the amounts and timing of recorded expenses brought about by changes in the factors mentioned above. A reduction in the estimated useful life of any item of property, plant and equipment would increase the recorded operating expenses and decrease the carrying value of the assets and vice versa.

There had been no changes in the estimated useful lives of property, plant and equipment in 2019 and 2018. The carrying values of property, plant and equipment are disclosed in Note 12 to the consolidated financial statements.

Valuation of land under revaluation basis
The Group's parcels of land are carried at revalued amounts, which approximate their fair values at the date of the revaluation, less any subsequent accumulated impairment losses. The revaluation is performed by professionally qualified appraisers and uses the Sales Comparison Approach (see Note 12). Revaluations are made every three to five years to ensure that the carrying amounts do not differ materially from those which would be determined using fair values at the reporting date.

Management believes that there is no significant change in the fair value of the parcels of land as of December 31, 2019 because there were no significant improvements made to such parcels of land from the last valuation date and no impairment indicators existed as of December 31, 2019.

As of December 31, 2019 and 2018, the carrying values of parcels of land carried at revalued amounts amounted to ₱3,117.63 million (see Note 12).

Recognition of deferred income tax assets
The Group reviews the carrying amounts of deferred income tax assets at each reporting date and adjusts the balance of deferred income tax assets to the extent that it is probable that the Group will be able to utilize the tax benefits arising from these deferred income tax assets and that sufficient future taxable profits are available for the utilization of the deferred income tax assets recognized.

Deferred income tax assets recognized amounted to ₱458.49 million and ₱396.41 million as of December 31, 2019 and 2018, respectively (see Note 23).

Estimation of retirement benefit obligation
The determination of the Group's retirement benefit obligation depends on the selection by management of certain assumptions used by the actuary in calculating such amounts. Those assumptions are described in Note 22 and include, among others the discount rate and rate of salary increase.

Net retirement obligation amounted to ₱146.59 million and ₱101.15 million as of December 31, 2019 and 2018, respectively (see Note 22).

4. Segment Information and Revenue from Contracts with Customers

The Group's management reports its operating business segments into the following: (a) consumer business, (b) institutional business, and (c) other operations. The consumer business segment manufactures ice cream products, milk and juices, and sells the latter together with pasta and rice-based mixes. The institutional business segment primarily manufactures flour and bread products, pasta and rice-based mixes but only sells flour and bread products. Other segments consist of lighterage, office space leasing and other services shown in aggregate as "Other operations". These are the operating segments reported to the chief operating decision maker.

The operating businesses are organized and managed separately according to the nature of the products and services provided, with each segment representing a strategic business unit that offers different products and serves different markets. All operating business segments used by the Group meet the definition of reportable segment under PFRS 8, *Segment Reporting*.

Management monitors the operating results of its business units separately for the purpose of making decisions about resource allocation and performance assessment. Segment performance is evaluated based on operating profit or loss and is measured consistently with operating profit or loss in the consolidated financial statements.

Segment assets include all operating assets used by a segment and consist principally of operating cash, receivables, inventories and property, plant and equipment, net of allowances and provisions. Segment liabilities include all operating liabilities and consist principally of trade, wages and taxes currently payable and accrued liabilities.

Intersegment transactions, i.e., segment revenues and segment expenses, include transfers between business segments. Those transfers are eliminated in consolidation and reflected in the "eliminations" column.

The Group does not have a single external customer from which revenue generated amounted to 10% or more of the total revenue of the Group.

Information with regard to the Group's significant business segments follows:

	2019						
	Consumer Business	Institutional Business	Other Operations	Unallocated Corporate Balances	Total	Eliminations	Consolidated

Revenue from Contracts with Customers

The Group's revenues are from its sale of goods and rendering of services. The Group's revenues are all recognized at a point in time (i.e. when it transfers control of goods to a customer or when the service is already rendered).

The following table disaggregates the Group's revenues on sale of goods by segment for the years ended December 31, 2019 and 2018:

	2019	2018
Institutional business	**₱4,089,187**	₱3,671,829
Consumer business	**11,197,075**	10,342,643
Total revenue from contracts with customers	**₱15,286,262**	₱14,014,472

Total revenue recognized from services rendered in 2019 and 2018 amounted to ₱44.20 million and ₱56.66 million, respectively.

5. Cash and Cash Equivalents and Short-term Cash Investments

Cash and cash equivalents

	2019	2018
Cash on hand and in banks	**₱1,381,351**	₱988,857
Cash equivalents	**2,243,167**	1,368,038
	₱3,624,518	₱2,356,895

Cash in banks earns interest at the respective bank deposit rates. Cash equivalents are short-term investments made for varying periods of up to three months depending on the immediate cash requirements of the Group, and earn interest at the respective short-term investment rates. Interest income earned from cash in banks and cash equivalents amounted to ₱2.76 million, ₱2.32 million and ₱0.82 million in 2019, 2018 and 2017, respectively (see Note 20).

Short-term cash investments
Short-term cash investments amounting to ₱649.45 million and ₱23.00 million as of December 31, 2019 and 2018, respectively, have maturities of more than three months to one year from dates of acquisition and earn interest at the prevailing market rates. Interest income earned on short-term cash investments amounted to ₱42.17 million, ₱31.14 million and ₱18.35 million in 2019, 2018 and 2017, respectively (see Note 20).

6. Receivables

	2019	2018
Trade receivables:		
Third parties	**₱2,033,404**	₱2,116,965
Related parties (Note 21)	**23,625**	35,154
Advances to related parties (Note 21)	**164,747**	235,380
Advances to officers and employees	**20,726**	38,275
Nontrade receivables	**51,176**	28,712
Other receivables	**42,080**	38,382
	2,335,758	2,492,868
Less: Allowance for ECL	**250,233**	171,189
	₱2,085,525	₱2,321,679

Trade receivables are noninterest-bearing and are generally on a 30 to 60 days term.

The movement in the allowance for doubtful accounts, which were determined using specific and collective impairment follows:

	2019					
	Trade receivables	**Nontrade receivables**	**Advances to officers and employees**	**Advances to related parties**	**Other receivables**	**Total**
At January 1,	**₱104,006**	**₱4,307**	**₱4,856**	**₱48,620**	**₱9,400**	**₱171,189**
ECL Provisions (Notes 18 and 19)	**59,375**	**–**	**–**	**–**	**23,256**	**82,631**
Write-offs	**(3,587)**	**–**	**–**	**–**	**–**	**(3,587)**
At December 31	**₱159,794**	**₱4,307**	**₱4,856**	**₱48,620**	**₱32,656**	**₱250,233**

	2018					
	Trade receivables	Nontrade receivables	Advances to officers and employees	Advances to Related Parties	Other receivables	Total
At January 1, as restated	₱157,915	₱4,307	₱4,856	₱–	₱9,400	₱176,478
ECL Provisions (Notes 18 and 19)	43,670	–	–	48,620	–	92,290
Write-offs	(97,579)	–	–	–	–	(97,579)
At December 31	₱104,006	₱4,307	₱4,856	₱48,620	₱9,400	₱171,189

7. Inventories

	2019	2018
At NRV:		
Raw materials	**₱685,931**	₱594,953
Finished goods	**643,452**	421,987
Spare parts and supplies	**126,606**	113,729
	1,455,989	1,130,669
At cost:		
Raw materials in transit	**28,854**	110,899
Goods in process	**304**	759
	29,158	111,658
	₱1,485,147	₱1,242,327

Total cost of inventories stated at NRV as of December 31, 2019 and 2018 are as follows:

	2019	2018
Raw materials	**₱673,432**	₱612,484
Finished goods	**690,035**	427,981
Spare parts and supplies	**130,776**	118,808
	₱1,494,243	₱1,159,273

The cost of inventories recognized as cost of goods sold amounted to ₱7,425.41 million, ₱6,753.43 million and ₱5,690.79 million for the years ended December 31, 2019, 2018 and 2017, respectively (see Note 17).

Movements in the allowance for losses and inventory obsolescence are as follows:

	2019	2018
Balance at beginning of year	**₱28,604**	₱22,881
Provisions (Note 17)	**34,902**	30,648
Write-off/reversal	**(25,252)**	(24,925)
Balance at end of year	**₱38,254**	₱28,604

Reversals of allowance for losses pertain to sale of inventories previously provided with such allowances.

8. Other Current Assets

	2019	2018
Prepaid expenses	**₱70,683**	₱109,800
Deposits on purchases	**35,014**	33,349
Creditable withholding taxes	**51,260**	20,913
Input VAT	**2,398**	13,528
Others	**81,165**	18,567
	₱240,520	₱196,157

9. HTC Investments

The Group invested in various quoted Peso-denominated government securities amounting to ₱85.07 million and ₱911.50 million as of December 31, 2019 and 2018, respectively. These securities have effective interest rates ranging from 2.53% to 5.12% for the year ended December 31, 2019 and 2.25% to 8.31% for the year ended December 31, 2018. These securities have maturities ranging from less than a year to 3 years.

The Group measures these bond investments as financial assets at amortized cost because the bond investments are held within a business model with the objective to hold financial assets in order to collect contractual cash flows and the contractual terms of the bond investments give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Movements in the HTC are as follows:

	2019	2018
At January 1	**₱911,497**	₱1,003,527
Additions	**610,939**	318,330
Amortizations	**18,806**	640
Maturities	**(321,050)**	(411,000)
Disposal	**(1,135,125)**	–
	₱85,067	₱911,497

Interest income earned amounted to ₱45.17 million and ₱34.33 million for the years ended December 31, 2019 and 2018, respectively (see Note 20).

In 2019, the Group sold HTC amounting to ₱1,135 million which resulted to the recognition of a gain on sale amounting to ₱7.12 million. Management has assessed that the remaining balance of its HTC portfolio investments will remain to be classified under financial assets at amortized cost because there has been no change in the business model for managing this financial asset.

As of December 31, 2019 and 2018, HTC investments were considered to be of investment grade thus, no provision for expected credit loss was recognized on these investments.

10. Investments in Joint Venture and Associate

	2019	2018
Cost	**₱141,313**	₱141,313
Accumulated equity in net earnings		
Beginning of year	**12,156**	10,932
Equity in net earnings for the year	**12,178**	12,156
Dividends received	**(12,158)**	(10,932)
End of year	**12,176**	12,156
Carrying value	**₱153,489**	₱153,469

Summarized financial information of Selecta Walls Land Corporation (SWLC), an associate, as of and for the years ended December 31 follow:

	2019	2018
Current assets (includes cash amounting to ₱26.61 million and ₱11.48 million as of December 31, 2019 and 2018, respectively)	**₱26,619**	₱25,877
Noncurrent assets	**226,296**	226,638
Current liabilities (includes income tax payable amounting to ₱0.86 million and ₱0.52 million as of December 31, 2019 and 2018, respectively)	**943**	587
Revenue	**26,930**	26,930
Interest income	**47**	59
Expenses	**2,006**	2,078
Provision for income tax	**4,674**	4,647
Net income	**20,297**	20,264

The carrying amount of the investment is computed as follows:

	2019	2018
Equity	**₱246,394**	₱246,360
Beneficial interest of the Group	**60%**	60%
Share of the Group	**147,836**	147,816
Premium paid	**2,528**	2,528
Carrying amount of the investment	**₱150,364**	₱150,344

Dividends received from SWLC amounted to ₱7.09 million, ₱6.38 million and ₱7.16 million in 2019, 2018 and 2017, respectively.

SWLC's registered office address and principal place of business is Manggahan Light Industrial Compound, Bo. Manggahan, Pasig City.

Engrain-RFM Pacific, Inc.
In 2013, the Parent Company entered into a joint arrangement with Engrain LLC to form a new corporation named Engrain-RFM Pacific, Inc., the primary purpose of which is to sell, market, distribute at wholesale enzyme-enhanced flour-based products for the Philippines and Asia Pacific market. The Parent Company has a 50% equity interest in the said arrangement. The Parent Company has accounted for its investment in Engrain-RFM Pacific, Inc. as a joint venture under PFRS 11.

Engrain-RFM Pacific, Inc. has not yet started commercial operations. Cost of investment in Engrain-RFM Pacific, Inc. amounted to ₱3.13 million as of December 31, 2019 and 2018.

Engrain-RFM Pacific, Inc.'s principal place of business is the same as with the Parent Company.

11. Interest in Joint Venture Proportionately Consolidated

URICI, a 50% joint venture of the Parent Company and Unilever Philippines, Inc. (UPI), is engaged in manufacturing, distributing, marketing, selling, importing, exporting and dealing in ice cream, ice cream desserts and ice cream novelties and similar food products. Based on the buy-out formula as stipulated in the shareholders' agreement between the Parent Company and Unilever Philippines, Inc.,

the estimated value of the Parent Company's 50% ownership interest in URICI amounted to ₱7,759.89 million and ₱7,030.11 million as of December 31, 2019 and 2018, respectively.

On October 1, 2012, the Parent Company requested from the SEC for an exemptive relief from the adoption of PFRS 11 on its investment in URICI. On November 22, 2012, upon consideration of the Parent Company's justifications, the SEC approved that the Parent Company be relieved from the adoption of PFRS 11 on its investment in URICI on the following grounds:

- Material impact

  The transition from the proportionate consolidation method to equity method in accounting for the Parent Company's interest in URICI would materially affect the Parent Company's consolidated financial statement line items decreasing revenue, gross profit, net operating income, gross assets and gross liabilities.

- Peculiarities of the arrangement

  a. The trademark agreement indicates that URICI can use "Selecta" licensed trademarks, trade names, logos, designs, symbols, words or devices other than the marks only upon approval of the Parent Company. This is an indication that the Parent Company has an indirect control on the activities being performed under the joint arrangement.

     The use of the trademark license by URICI is under the control of the Parent Company. Accordingly, the main products produced by URICI must conform to the quality standards of the Parent Company.

  b. URICI does not own any real property and instead, has a lease agreement with SWLC, the lessor. SWLC is 35% and 25% owned by the Parent Company and WS Holdings, Inc. (WSHI), respectively, and 40% owned by Unilever, a foreign corporation. WSHI is 60% owned by the Parent Company.

Presented below is the impact (in thousands) on the consolidated financial statements if PFRS 11 is applied on the Parent Company's investment in URICI:

In 2017, the Parent Company entered into a supply agreement with Buhler Asia Pte., Ltd. for the installation and the commissioning for the equipment for hard wheat mill. As of December 31, 2018, the Parent Company already received the equipment for hard wheat mill from Buhler Asia Pte, Ltd. (see Note 24).

Construction in progress (CIP) as of December 31, 2019 includes the Tetra Line expansion of the Milk and Juice Division and, as of December 31, 2018, includes the construction of warehouse in Cabuyao.

In 2018, the Group sold various items of property, plant and equipment with a total net book value of ₱4.24 million for ₱0.85 million, resulting to a net loss of ₱3.38 million.

Land
As of December 31, 2019 and 2018, the aggregate fair values of land amounted to ₱3,117.63 million. The fair values of land were determined on December 31, 2017 using the Sales Comparison Approach. This is a comparative approach to value that considers the sales of similar or substitute properties and related market data and establishes a value estimate by processes involving comparison. Listings and offerings may be considered. Factors such as the property location, desirability, neighborhood, utility, size, terrain and the time element are involved in estimating the market value of the land. The valuation is performed by an SEC-accredited independent valuer who has valuation experience for similar properties in the Philippines since 1980. A net gain from the revaluation of the land amounting to ₱446.67 million was recognized in 2017. The cost of these parcels of land amounted to ₱560.94 million as of December 31, 2019 and 2018.

The fair value has been categorized as Level 3 fair value measurement based on the inputs to valuation technique used. The significant unobservable valuation input used is price per square meter ranging from ₱54,400 to ₱75,700. Significant increases (decreases) in estimated price per square meter in isolation would result in a significantly higher (lower) fair value on a linear basis. Management believes there is no significant change in fair value of the parcels of land as of December 31, 2019 and 2018.

Trademark
In January 2014, the Parent Company acquired the Royal trademark from the Unilever Group for ₱2.1 billion (US$46.0 million). Management assessed that the Royal pasta trademark has an indefinite useful life (see Note 3). Consequently, the trademark is subject to impairment testing at least annually or when impairment indicators are identified. Management has determined that the recoverable amount of trademark is fair value less cost of disposal wherein fair value is determined using the relief from royalty method. This method considers royalty savings accruing to the Parent Company arising from the ownership of the trademark using cash flow projections based on the financial budgets approved by senior management covering 10-year explicit forecast period. Management assessed the costs of disposal, which mainly pertain to the cost of transferring the certificate of registration with the Intellectual Property Office and documentary stamp tax, to be insignificant.

Key assumptions used to determine the fair value as of and for the years ended December 31 follow:

Assumptions	**2019**	2018	Description
Discount rate	**11.3%**	11.7%	Pre-tax rate that reflects current market assessment of the time value of money and the risks specific to the asset. Management used discount rate based on weighted average cost of capital (WACC).
Growth rates	**6% to 40%**	7% to 50%	Growth rates in revenues are based on the Parent Company's expectations of market developments and past historical performance. Growth rates used are highest on the immediately preceding years and flattens over the budget period. The growth rate used to project revenue in the long term is 6% in 2019 and 7% in 2018.
Royalty savings rate	**10%**	10%	Royalty savings rate is based on the prevailing comparable past trademark royalty rate obtained from survey by independent third party.
Budgeted brand support	**3%**	3%	Cash flow forecast for brand support is based on past experience and is approved by the Parent Company's senior management. Brand support is based on revenues.

As of December 31, 2019 and 2018, the recoverable amount of the trademark is higher than its carrying value. Management believes that a decrease in long-term growth rate by 4.8% and 4.5% as of December 31, 2019 and 2018 would cause the carrying value of the Royal pasta trademark to exceed the recoverable amount.

Goodwill

Goodwill amounting to ₱190.56 million pertains to the Parent Company's investment in URICI (see Note 2). Goodwill is subject to impairment testing at least annually or when impairment indicators are identified. Management has determined that the recoverable amount of the goodwill is value-in-use, which is based on a discounted cash flow model. The cash flow projections are based on financial projections approved by senior management covering a 5-year explicit forecast period, including a terminal value.

Key assumptions used to determine value-in-use as of and for the years ended December 31, 2019 and 2018 follow:

Assumptions	**2019**	2018	Description
Discount rate	**7.91%**	7.10%	Pre-tax rate that reflects current market assessment of the time value of money and the risks specific to the asset. Management used discount rate based on weighted average cost of capital (WACC).
Growth rates	**10% to 10.2%**	9% to 10%	Growth rates in revenues are based on URICI's expectations of market developments and past historical performance.
Operating expenses and maintenance capital expenditures			Are based on approved financial budgets by the senior management

As of December 31, 2019 and 2018, the recoverable amount of URICI is higher than its carrying value.

14. Accounts Payable and Other Current Liabilities

	2019	2018
Accrued expenses	**₱2,216,048**	₱1,931,085
Trade payables:		
Third parties	**1,619,824**	1,404,225
Related parties (Note 21)	**35,209**	51,726
Advances from related parties (Note 21)	**116,421**	293,017
Withholding taxes and other government payables	**56,148**	52,210
Refund liabilities	**25,642**	38,481
Due to customers	**–**	205
Other payables	**85,180**	105,111
	₱4,154,472	₱3,876,060

Trade payables are noninterest-bearing and are generally settled on 30-60 days' terms.

Other payables include advances from officers and employees, other deferred credits, and cash bonds from distributors as security to retain their credit line.

Details of accrued expenses are as follow:

	2019	2018
Advertisements and promotions	**₱778,558**	₱810,380
Profit bonus	**454,382**	285,373
Payroll	**184,911**	163,388
Freight and handling	**150,223**	185,981
Manpower services	**82,865**	96,395
Importation	**47,020**	25,951
Commission	**44,368**	33,138
Rentals	**29,258**	56,787
Accrued merchandising charges	**10,168**	57,675
Utilities	**4,735**	4,736
Interest (Note 15)	**2,917**	2,071
Others	**426,643**	209,210
	₱2,216,048	₱1,931,085

Other accrued expenses mainly consist of accruals made for royalties and utilities.

15. Bank Loans

Bank loans represent the Group's proportionate share in the unsecured short-term loans of URICI from local banks and lending investors bearing effective annual interest rates within the range of 4.45% to 4.70% in 2019 and 2.35% to 3.00% in 2018. The Group's share in the outstanding principal balance of these bank loans amounted to ₱978.5 million and ₱440 million as of December 31, 2019 and 2018, respectively.

The movements in bank loans are as follows:

	2019	2018
At January 1	**₱440,000**	₱556,500
Availments	**116,231,500**	69,276,750
Payments	**(115,693,000)**	(69,393,250)
	₱978,500	₱440,000

Interest expense on bank loans amounted to ₱28.68 million, ₱19.57 million and ₱11.68 million in 2019, 2018 and 2017, respectively (see Note 20).

16. Equity

Capital stock

On October 14, 2013, the SEC approved the amendment of the Parent Company's articles of incorporation to remove the pre-emptive rights of the stockholders to all issuances or dispositions of any class of shares of the Parent Company, unless otherwise prescribed by the BOD.

As of December 31, 2019 and 2018, the Parent Company has 3,978,265,025 authorized common shares with ₱1 par value per share. Issued and outstanding common shares of 3,456,682,858 and 3,482,057,866 are held by 3,141 and 3,157 shareholders as of December 31, 2019 and 2018, respectively.

As of December 31, 2019 and 2018, capital stock consists of the following:

	Number of Shares			
	Authorized		**Issued and Outstanding**	
	2019	2018	**2019**	2018
Issued	**3,978,265,025**	3,978,265,025	**3,500,403,866**	3,500,403,866
Addition	**–**	–	**150,617,444**	–
Less: Treasury stock	**–**	–	**(194,338,452)**	(18,346,000)

2019	Various	4,120,492	(l)
		3,456,682,858	

(a) On July 28, 1994, the SEC approved the Parent Company's declaration of a 50% stock dividend.
(b) On April 7, 1995, the SEC approved a 5-for-1 stock split for the common stock, effectively reducing the par value from ₱10.00 to ₱2.00.
(c) This is the result of the conversion of Parent Company's preferred shares to common shares. Conversion of shares was made at various dates within the year.
(d) Information on the offer price is not available since the shares were not issued in relation to a public offering.
(e) On June 28, 2007, the SEC approved the 2-for-1 stock split for the common stock, effectively reducing the par value from ₱2.00 to ₱1.00.
(f) Cost of retired shares amounted to ₱991.76 million.
(g) On March 24, 2014, the Parent Company issued additional 340.00 million shares.
(h) Purchased 74.97 million treasury stock amounting to ₱313.68 million on various dates in 2016. Re-issued 70.81 million treasury stock amounting to ₱302.23 million on various dates in 2016 resulting in excess of issue price over the cost of treasury stock amounting to ₱8.71 million which is presented under "Additional paid-in capital" account in equity.
(i) Purchased 26.59 million treasury stock amounting to ₱121.80 million on various dates in 2017. Re-issued 27.86 million treasury stock amounting to ₱129.80 million on various dates in 2017 resulting in excess of issue price over the cost of treasury stock amounting to ₱2.14 million which is presented under "Additional paid-in capital" account in equity.
(j) Purchased 19.66 million treasury stock amounting to ₱92.76 million on various dates in 2018. Re-issued 4.20 million treasury stock amounting to ₱20.68 million on various dates in 2018 resulting in excess of cost of treasury stock over the issue price amounting to ₱0.22 million which is presented under "Additional paid-in capital" account in equity.
(k) Purchased 34.68 million treasury stock amounting to ₱167.24 million on various dates in 2019. Re-issued 5.18 million treasury shares amounting to ₱24.23 million on various dates in 2019 resulting in excess of cost of treasury shares over the issue price amounting to ₱1.16 million which is presented under "Additional paid-in capital" account in equity.
(l) This is the result of issuance of shares of the Parent Company, as a consideration for the merger, 4,120,492 shares were issued to the minority shareholders and 146,496,952 shares were considered as treasury shares (Note 1).

Retained earnings

The details of the Parent Company's declaration of cash dividends follow:

Date of BOD Approval	Amount (in millions)	Type	Amount per share	Record date	Payment Date
July 24, 2019	₱271.25	Cash	₱0.077400	August 7, 2019	September 4, 2019
January 30, 2019	282.11	Cash	0.080500	February 14, 2019	March 13, 2019
September 7, 2018	222.97	Cash	0.063700	September 21, 2018	October 17, 2018
January 31, 2018	300.02	Cash	0.085710	February 15, 2018	March 14, 2018
September 27, 2017	200.19	Cash	0.057500	October 11, 2017	November 8, 2017
January 31, 2017	300.00	Cash	0.085760	February 14, 2017	March 10, 2017
August 24, 2016	174.27	Cash	0.050000	September 8, 2016	February 8, 2017

The Group's retained earnings as of December 31, 2019 is restricted for the payment of dividends to the extent of the cost of treasury stock, deferred income tax assets, accumulated equity in undistributed net earnings of an associate and consolidated subsidiaries amounting to ₱647.42 million. In accordance with Revised SRC Rule 68, Annex 68C, the retained earnings available for dividend declaration as of December 31, 2019 amounted to ₱4.38 billion.

17. Cost of Sales and Services

	2019	2018	2016

Interest expense on bank loans (Note 15)	**₱28,678**	₱19,569	₱11,680
Interest expense on lease liability (Note 29)	**38,448**	–	–
Others	**273**	1,080	4,593
	₱67,399	₱20,649	₱16,273

21. Related Party Transactions

Related party relationship exists when the party has the ability to control, directly or indirectly, through one or more intermediaries, or exercise significant influence over the other party in making financial and operating decisions. Such relationships also exist between and/or among entities which are under common control with the reporting entity and its key management personnel, directors or stockholders. In considering each possible related party relationship, attention is directed to the substance of the relationships, and not merely to the legal form.

Terms and Conditions of Transactions with Related Parties
There have been no guarantees provided or received for any related party receivables or payables. These accounts are non-interest bearing, generally unsecured and will be settled in cash. This assessment is undertaken each financial year through examining the financial position of the related party and the market in which the related party operates.

The Parent Company's transactions and account balances with related parties follows:

		2019		2018				
Related Parties	Transaction	**Amount**	**Outstanding receivable (payable)**	Amount	Outstanding receivable (payable)	Statement of Financial Position Account	Terms	Conditions

The statements of financial position for the years ended December 31, 2019 and 2018 include the following amounts resulting from transactions with related parties:

	2019	2018
Trade receivables - related parties (Note 6)	**₱23,625**	₱35,154
Advances to related parties (Note 6)	**164,747**	235,380
Trade payables - related parties (Note 14)	**(35,209)**	(51,726)
Advances from related parties (Note 14)	**(116,421)**	(293,017)

On October 18, 2017, REI and Philtown Properties, Inc. (Philtown) executed a loan agreement whereby REI agreed to lend Philtown a total amount of ₱82.71 million. Philtown assigned its receivables from a third party worth ₱29.17 million to secure a portion of the loan while the rest is secured by a real estate mortgage executed by Philtown. As of December 31, 2019 and 2018, outstanding receivables from Philtown related to this agreement amounted to ₱36.02 million, ₱45.11 million of which is presented as part of "Receivables" in the consolidated statements of financial position (see Note 6).

Significant transactions with subsidiaries and joint venture which have been eliminated in the consolidation:

a. Distribution services provided by the Parent Company to URICI for the export of frozen dairy dessert/mellorine whereby URICI pays service fees equivalent to 7% of the total net sales value of goods distributed. Service fees amounted to ₱20.65 million, ₱21.45 million and ₱30.49 million in 2019, 2018 and 2017, respectively.

b. In 2013, the Parent Company entered into an agreement with its subsidiary, ICC, to manufacture and store its products by providing skilled manpower, supervision, tools, equipment and all related works and services necessary to manufacture and store the products in accordance with the quality standards set by the Parent Company. ICC renewed its agreement for a period of one (1) year from January 1, 2019 to December 31, 2019. The agreement was terminated as of January 31, 2019 in consideration of the merger.

c. The Parent Company engages RLC for its lighterage requirements. Service fees to RLC amounted to ₱50.16 million, ₱42.87 million and ₱37.98 million in 2019, 2018 and 2017, respectively.

d. In 2018, the Parent Company entered into lease agreement with CLIC for the use of CLIC's operational service areas for a period of one year from January to December. Monthly rental payments ranged from ₱816,873, to ₱1,725,719 during 2018. The Parent Company continued to lease the operational service areas of the Company until the period ended January 31, 2019, with the rental payment ranging from ₱0.82 million to ₱1.73 million.

e. The Parent Company leases its office space in Mandaluyong City from IAC, one of its subsidiaries. Starting April 2018, IAC entered into a lease agreement with the Parent Company for a term of 5 years. The agreement was terminated as of January 31, 2019 in consideration of the merger.

Compensation of key management personnel of the Group by benefit type follows:

	2019	2018
Salaries and other short-term benefits	**₱72,127**	₱43,093
Proportionate share in share-based compensation of URICI	**836**	–
Retirement benefits costs	**19,748**	7,735
	₱92,711	₱50,828

22. Retirement Benefits

The Parent Company, joint venture and certain subsidiaries have funded, noncontributory defined benefit retirement plans (the Plans) covering substantially all their permanent employees.

a. Retirement Benefit Cost

The components of retirement benefit cost recognized in the consolidated statements of income for the years ended December 31 follow:

	2019	2018	2017
Current service cost	**₱18,527**	₱20,993	₱21,414
Net interest cost	**5,853**	7,227	8,063
Curtailment loss	**–**	–	11,762
Retirement benefits costs	**₱24,380**	₱28,220	₱41,239

b. Net Retirement Obligation

The details of the net retirement obligation recognized in the consolidated statements of financial position as of December 31, 2019 and 2018 follow:

	2019	2018
Defined benefit obligation	**₱404,004**	₱322,588
Fair value of plan assets	**(257,416)**	(221,441)
Net retirement obligation	**₱146,588**	₱101,147

Movement in net retirement obligation follow:

	2019	2018
January 1	**₱101,147**	₱161,671
Retirement benefit cost	**24,380**	28,220
Remeasurement loss (gain)	**63,303**	(34,240)
Transfers	**(2,702)**	–
Actual contribution	**(38,452)**	(48,000)
Benefits paid out of Group's funds	**(1,088)**	(6,504)
Net retirement obligation	**₱146,588**	₱101,147

Changes in the present value of the defined benefit obligation follow:

	2019	2018
January 1	**₱322,588**	₱356,822
Current service cost	**18,527**	20,993
Interest cost	**22,351**	18,931
Remeasurement loss (gain)	**65,706**	(44,785)
Benefits paid out plan assets	**(21,378)**	(22,869)
Benefits paid directly out of the Group's fund	**(1,088)**	(6,504)
Transfers	**(2,702)**	–
December 31	**₱404,004**	₱322,588

Changes in the fair value of plan assets follow:

	2019	2018
January 1	**₱221,441**	₱195,151
Contributions	**38,452**	48,000
Asset return included in net interest cost	**16,497**	11,703
Benefits paid	**(21,377)**	(22,868)
Remeasurement gain (loss)	**2,403**	(10,545)
December 31	**₱257,416**	₱221,441

Breakdown of the plan assets follow:

	2019	2018
Investments in:		
Debt securities other than bonds	**₱14,295**	₱20,259
Equity securities	**5,434**	5,149
Corporate bonds	**154,461**	97,577
Real estate	**6,195**	6,195
Unit investment trust fund	**73,111**	49,870
Cash and cash equivalents	**2,630**	41,880
Receivables	**1,401**	1,293
	257,527	222,223
Payables	**(111)**	(782)
	₱257,416	₱221,441

The plan assets are held by a trustee bank. The investing decisions of these plan assets are made by the authorized officers of the Company.

The principal assumptions used in determining the defined benefit obligation of the Group follow:

	December 31		January 1
	2019	2018	2018
Discount rate per annum	**4.78% to 5.00%**	7.24% to 7.26%	5.00% to 5.62%
Future annual increase in salary rate	**5.00% to 5.90%**	5.00% to 5.90%	5.00% to 5.90%

The following are expected payments to be made out of the defined benefit plan obligation in the future years:

	2019	2018
One year and less	**₱24,167**	₱23,759
Between 1 and 5 years	**206,334**	165,011
Between 5 and 10 years	**209,922**	213,065
Between 10 and 15 years	**103,350**	103,493
Between 15 and 20 years	**122,830**	104,538
Beyond 20 years	**256,336**	225,171
Total expected payments	**₱922,939**	₱835,037

The average duration of the defined benefit plan obligations as of December 31, 2019 and 2018 ranges from 11-16 years.

The Group expects to contribute ₱44.75 million to the retirement fund in 2020.

The sensitivity analysis below has been determined based on reasonably possible changes of each significant assumption on the defined benefit obligation as of December 31, assuming if all other assumptions were held constant:

	Discount rate		Future salary increases	
	+1%	**-1%**	**+1%**	**-1%**
2019	**(₱28,477)**	**₱33,538**	**₱24,774**	**(₱10,258)**
2018	(₱22,614)	₱20,323	₱21,818	(₱19,494)

23. Income Taxes

a. The components of the Group's net deferred income tax liabilities follow:

	2019	2018
Deferred income tax recognized in profit or loss:		
Deferred income tax assets on:		
NOLCO	**₱1,436**	₱–
Excess MCIT	**62**	–
Allowances for:		
Doubtful accounts	**64,913**	35,052
Inventory losses and obsolescence	**11,476**	6,940
Impairment loss on property, plant and equipment	**6,516**	6,542
Accrued advertisements and promotions	**70,477**	103,833
Accrued profit bonus	**136,315**	84,819
Unamortized past service cost	**31,852**	29,977
Net retirement obligation	**12,514**	8,366
Accrued retirement liability	**13,804**	12,189
Provision for restructuring	**5,878**	6,202
Net lease liability	**23,838**	–
Others	**13,657**	55,726
	392,738	349,646
Deferred income tax liabilities on:		
Net retirement obligation	**(41,496)**	(34,436)
Capitalized borrowing cost	**–**	(193)
Others	**(1,345)**	(883)
	(42,841)	(35,512)
Deferred income tax recognized in other comprehensive income:		
Deferred income tax asset on cumulative actuarial losses on defined benefit plan	**65,755**	46,764
Deferred income tax liability on revaluation increment on land	**(767,008)**	(767,008)
	(701,253)	(720,244)
Net deferred income tax liabilities	**(₱351,356)**	(₱406,110)

a. The Group did not recognize deferred income tax assets on following:

	2019	2018
NOLCO	**₱438**	₱119
Excess MCIT	**149**	289
Allowances for ECL	**33,856**	118,014
Unamortized discount	**196**	326

NOLCO:

Inception Year	Amount	Applied/Expired	Balance	Expiry Year
2016	₱183	₱183	₱–	2019
2017	241	79	162	2020
2018	125	–	125	2021
2019	4,938	–	4,938	2022
	₱5,487	₱262	₱5,225	

Excess MCIT:

Inception Year	Amount	Applied/Expired	Balance	Expiry Year
2016	₱89	₱89	₱–	2019
2017	102	–	102	2020
2018	98	–	98	2021
2019	11	–	11	2022
	₱300	₱89	₱211	

b. A reconciliation of the provision for income tax computed at the statutory income tax rate of 30% based on income before income tax to the provision for income computed at the Group's effective income tax rate for the years ended December 31 follows:

	2019	2018	2017
Provision for income tax at the statutory income tax rate 30%	**₱517,916**	₱465,465	₱442,461
Additions to (reductions in) income tax resulting from:			
Nontaxable equity in net earnings of an associate	**(3,653)**	(3,647)	(3,280)
Interest income subjected to final tax	**(26,052)**	(18,988)	(10,798)
Movement in unrecognized deferred income tax	**35**	(522)	12,879
Nondeductible expenses	**11,808**	6,048	674
Others	**(3,356)**	(3,511)	(11,827)
Provision for income tax	**₱496,698**	₱444,845	₱430,109

24. Contracts and Commitments

a. The Parent Company entered into license agreements with Sunkist Growers, Inc., Rovio Entertainment Ltd., and Turner Broadcasting System Asia Pacific, Inc. whereby the licensors granted the Company the non-exclusive license to manufacture, market, distribute and sell the licensed products. The Parent Company agreed to pay a fixed amount of royalty every year, as stipulated in the agreements. Unpaid royalty, included under "Other accrued expenses" account, amounted to ₱4.87 million and ₱9.65 million as of December 31, 2019 and 2018. respectively (see Note 14).

b. In 2017, the Parent Company entered into a supply agreement with Buhler Asia Pte., Ltd. for the installation and the commissioning for the equipment for hard wheat mill. As of December 31, 2018, the installation of the equipment has already been completed and classified in the books as Machinery and Equipment amounting to ₱210.58 million (see Note 9).

25. Earnings Per Share

The Group does not have potentially dilutive common shares in 2019, 2018 and 2017. Therefore, the basic/dilutive earnings per share are the same.

	2019	2018	2017
Net income attributable to equity holders of the Parent Company (a)	**₱1,230,481**	₱1,109,009	₱1,042,345
Weighted average number of common shares outstanding (b)	**3,463,538,936**	3,493,216,981	3,484,906,329
Basic/diluted earnings per share (a/b)	**₱0.36**	₱0.32	₱0.30

26. Financial Instruments

The following table summarizes the carrying values of the Group's financial assets and financial liabilities as of December 31:

	2019	2018
Financial Assets		
Cash on hand	**₱86,214**	₱254,077
Cash in banks and cash equivalents	**3,538,304**	2,102,818
Short-term cash investments	**649,449**	23,000
Trade receivables	**1,897,235**	2,048,113
Advances to related parties	**116,127**	186,760
Nontrade receivables	**46,869**	20,098
Advances to officers and employees	**15,870**	33,419
Other receivables	**9,424**	28,982
	6,359,492	4,697,267
HTC investments	**85,067**	911,497
	6,444,559	5,608,764
Other Financial Liabilities		
Bank loans	**978,500**	440,000
Accounts payable and other current liabilities*	**3,981,903**	3,530,833
Advances from related parties	**116,421**	293,017
	₱5,076,824	₱4,263,850

**Exclusive of government payables and other nonfinancial liabilities amounting to ₱56.15 million and ₱52.21 million as of December 31, 2019 and 2018, respectively.*

Cash, cash equivalents, trade receivables, nontrade receivables, advances to officers and employees, other receivables, accounts payable and accrued liabilities, advances from related parties. The carrying amounts of these instruments approximate their fair values due to their short-term maturities and demand features.

HTC investments. The fair value of the HTC investments as of December 31, 2019 and 2018 amounted to ₱85.07 million and ₱911.50 million and was determined by reference to quoted market bid prices of bonds with similar terms and nature at the close of business on the reporting date (Level 1).

27. Financial Risk Management Objectives and Policies

The Group's principal financial instruments include non-derivative instruments such as cash and cash equivalents, short-term cash investments, HTC investments, accounts receivable, bank loans, accounts payable and accrued liabilities, and advances to and from related parties. The main purpose of these financial instruments includes raising funds for the Group's operations and managing identified financial risks. The Group has various other financial assets and financial liabilities such as other current receivables, other current assets and customers' deposits which arise directly from its operations. The main risk arising from the use of financial instruments is credit risk, liquidity risk, interest rate risk and foreign exchange risk.

Credit risk

Credit risk arises from the risk of counterparties defaulting. Management is tasked to minimize credit risk through strict implementation of credit, treasury and financial policies. The Group deals only with reputable counterparties, financial institutions and customers. To the extent possible, the Group obtains collateral to secure sales of its products to customers. In addition, the Group transacts with financial institutions belonging to the top 25% of the industry, and/or those which provide the Group with long-term loans and/or short-term credit facilities.

The Group does not have significant concentrations of credit risk and does not enter into financial instruments to manage credit risk. The Group's gross maximum exposure to credit risk is equal to the carrying amount of its financial assets, before taking into account any collateral and other credit enhancements.

Set out below is the information about the credit risk exposure on the Company's financial assets using provision matrix as of December 31, 2019 and 2018:

December 31, 2019:

	Cash in banks and cash equivalents	Short term cash investments	HTC Investments	Trade receivables						
					Days past due					
				Current	< 30 days	<30-60 days	<61-90 days	<91-365 days	>365 days	Total
Expected credit loss rate	**–%**	**–%**	**–%**	**0.01%–0.09%**	**0.01%–1.18%**	**0.01%–5.55%**	**0.06%–21.52%**	**3.27%–44.26%**	**52.63%–100%**	
Estimated total gross carrying amount at default	**₱3,538,304**	**₱649,449**	**₱85,067**	**₱1,409,347**	**₱340,329**	**₱78,495**	**₱19,529**	**₱8,864**	**₱200,465**	**₱2,057,029**
Expected credit loss	**₱–**	**₱–**	**₱–**	**₱6,159**	**₱1,930**	**₱938**	**₱519**	**₱1,891**	**₱148,357**	**₱159,794**

December 31, 2018:

	Cash in banks and cash equivalents	Short term cash investments	HTC Investments	Trade receivables						
					Days past due					
				Current	< 30 days	<30-60 days	<61-90 days	<91-365 days	>365 days	Total
Expected credit loss rate	–%	–%	–%	0.01%–0.09%	0.01%–1.18%	0.01%–5.55%	0.06%–21.52%	3.27%–44.26%	52.63%–100%	
Estimated total gross carrying amount at default	₱2,102,818	₱23,000	₱911,747	₱1,201,480	₱392,265	₱135,848	₱43,973	₱233,684	₱144,869	₱2,152,119
Expected credit loss	₱–	₱–-	₱–	₱5,186	₱2,224	₱1,624	₱1,169	₱49,852	₱111,134	₱171,189

Credit quality of cash in banks, cash equivalents and short-term cash investments are based on the nature of the counterparty and the Group's internal rating system.

Financial assets that are neither past due nor impaired are classified as "Excellent" account when these are expected to be collected or liquidated on or before their due dates, or upon call by the Group if there are no predetermined defined due dates. All other financial assets that are neither past due or impaired are classified as "Good" accounts.

Liquidity risk
Liquidity risk arises from the possibility that the Group may encounter difficulties in raising funds to meet commitments from financial instruments.

Management is tasked to minimize liquidity risk through prudent financial planning and execution to meet the funding requirements of the various operating divisions within the Group; through long-term and short-term debts obtained from financial institutions; through strict implementation of credit and collection policies, particularly in containing trade receivables; and through capital raising, including equity, as may be necessary. Working capital requirements, on the other hand, are adequately addressed through short-term credit facilities from financial institutions. Trade receivables are kept within manageable levels.

The following tables show the maturity profile of the Group's undiscounted cash flows from financial assets used for liquidity purposes and other financial liabilities as of December 31, 2019 and 2018.

As of December 31, 2019:

	Less than 1 year	**1 to less than 2 years**	**2 to less than 3 years**	**3 to less than 4 years**	**4 to less than 5 years**	**More than 5 years**	**Total**

**Excluding payable to government agencies of ₱52.21 million.*

Interest rate risk
The Group's exposure to changes in interest rates relates primarily to the Group's short-term and long-term debt obligations.

Management is tasked to minimize interest rate risk by having a mix of variable and fixed interest rates on its loans. As of December 31, 2019 and 2018, the Group's share in URICI's outstanding bank loans include only short-term loans from local banks and lending investors (see Note 15). URICI is not expecting significant exposures to interest rate risk considering the short term maturities of its bank loans.

There is no other impact on the Group's equity other than those affecting the statement of income.

Foreign exchange risk
The Group's exposure to foreign exchange risk results from the Parent Company's and URICI's business transactions and financing agreements denominated in foreign currencies.

Management is tasked to minimize foreign exchange risk through the natural hedges arising from its export business and through external currency hedges. Presently, trade importations are immediately paid or converted into Peso obligations as soon as these are negotiated with suppliers. The Group has not done any external currency hedges in 2019 and 2018.

A reasonably possible change of –/+1% in 2019 and –/+ 1% in 2018 in United States dollar (US$) exchange rate at December 31, 2019 and 2018 would lead to the following income before income tax movements in the Group's consolidated statements of income:

December 31, 2019:

		Increase (decrease) in income before income tax	
	Peso equivalent of US dollar denominated assets/liabilities	**US dollar weakened by 1% against Philippine peso**	**US dollar strengthened by 1% against Philippine peso**
Cash and cash equivalents	**₱449,169**	**(4,492)**	**4,492**
Trade receivables	**24,551**	**(246)**	**246**
Trade payables	**6,305**	**63**	**(63)**
	₱480,025	**(₱4,675)**	**₱4,675**

December 31, 2018:

		Increase (decrease) in income before income tax	
	Peso equivalent of US dollar denominated assets/liabilities	US dollar weakened by 1% against Philippine peso	US dollar strengthened by 1% against Philippine peso
Cash and cash equivalents	₱ 342,876	(3,429)	3,429
Trade receivables	38,385	(384)	384
Trade payables	6,381	64	(64)
	₱387,642	(₱3,749)	₱3,749

The exchange rate of the Peso to the US Dollar is ₱50.64 and ₱52.58 as of December 31, 2019 and 2018, respectively.

There is no other impact on the Group's equity other than those affecting the consolidated statements of income.

28. Capital Management

It is the objective of the Group to maintain a capital base that adequately services the needs of its present and future operations while keeping within the capital level required by creditors. The capital base is also sufficient to address present and future uncertainties and risks inherent in the business and changes in the economic conditions. Payment of dividends, return of capital, or issuance of shares to increase capital shall be made accordingly and as may be necessary. No changes were made in the objectives, policies and processes as of December 31, 2019 and 2018.

The table below summarizes the total capital considered by the Group:

	2019	2018
Capital stock	**₱3,651,021**	₱3,500,404
Additional paid-in capital	**2,060,383**	2,059,220
Treasury stock	**(375,918)**	(86,408)
Retained earnings	**5,026,575**	4,450,664
	₱10,362,061	₱9,923,880

29. Leases and Events after the Reporting Date

Leases

The Group as lessor

The Group entered into lease agreements with third parties covering its office spaces. for a period of one (1) to five (5) years, subject for renewal unless terminated by the Company. The leases generally provide for either (a) a fixed monthly rent, or (b) with an escalation rate of 5% to 10% per annum. The lease agreements generally provide fixed monthly rent. The Group records rental income on a straight-line basis over less noncancellable lease term. Lease income recognized in 2019 and 2018 amounted to ₱15.67 million and ₱21.05 million, respectively under "Services and others" in the statement of income.

Future minimum rental receivables under noncancellable operating leases as of December 31, 2019 and 2018 are as follows:

	2019	2018
Within one year	**₱3,442**	₱4,024
After one year but not more than five years	**7,939**	8,234
	₱11,381	₱12,258

The Group as lessee

The Group has lease contracts for various items of warehouses, fleets and depots. Leases of warehouses generally have lease terms between six (6) months and three (3) years. There are several lease contracts that include extension and termination options and variable lease payments.

a. Lease of warehouse space from Edenfield Resources & Development Corp. located at Molson Park, C.A. Yulo Ave., Canlubang Industrial Park, Calamba, Philippines with a monthly rental fee of ₱2.33 million with 5% annual escalation clause. The lease contract shall be for a period of three (3) years and commenced on March 1, 2017 and to expire on February 28, 2020 and was renewed for another 2 years upon mutual agreement prior to expiration of the lease term.

b. Lease of warehouse space from Accupank Philippines, Inc. situated in Molave Street, CERIS II, Canlubang, Laguna for a period of one (1) year from October 25, 2017 until October 25, 2018 with option to renew upon mutual agreement. The lease contract was

renewed for another one (1) year from October 23, 2018 up to October 22, 2019 and prior to the expiration of the lease term it was extended for another two months which ended on December 31, 2019. Total rent expense from the contract as at December 31, 2019 and 2018 amounted to ₱3.19 million.

c. Lease of warehouse space from Maxilite Merchandising Inc. located at 9128 National Road, Purok 1, Brgy. Banlic, Cabuyao, Laguna. The lease shall be for the minimum lock-in period of six (6) months commencing on August 23, 2019 and expiring on February 23, 2020, renewable for another six months, subject to mutual agreements on the terms and conditions. Prior to the expiration of the lease, it was renewed for another six (6) months commencing on February 24, 2020 until July 23, 2020. Monthly rental fee is ₱1.05 million.

d. Lease agreement with Selecta Wall's Land Corporation for a parcel of land for a period of fifty (50) years from April 1, 1999 until March 30, 2019 with an option to exercise a unilateral and irrevocable option to extend the lease for an additional term of twenty-five (25) years. Total lease payments every year is ₱26.93 million.

e. Various lease agreements for URICI's depots around the Philippines with a monthly rental ranging from ₱0.15 million to ₱6.32 million and a term of 2 years to 10 years.

f. Numerous leases of fleet (e.g. leases of company cars and vans) used on the movement of products and daily operations. The lease contracts shall be for a period of five (5) years without option to renew. Monthly rental fee is ranging from ₱0.01 million to ₱0.05 million.

The Group also has certain leases of equipment and vehicles used in its operations with lease terms of 12 months or less and other equipment considered as low value assets. The Group applies the 'short-term lease' and 'lease of low-value assets 'recognition exemptions for these leases.

The following are the amounts recognized in consolidated statement of income for 2019:

Depreciation expense of right-of-use assets (Note 12)	₱73,043
Interest expense on lease liabilities (Note 20)	38,448
Expenses relating to:	
Short-term leases included in cost of goods sold and selling and marketing expenses (Notes 17 and 18)	145,507
Leases of low-value assets included in selling and marketing expenses and general and administrative expenses (Notes 17 and 19)	7,679
Total amount recognized in consolidated statement of income	₱264,677

The rollforward analysis of lease liabilities as of December 31, 2019 follow:

At January 1	₱522,449
Additions	41,567
Interest expense	38,448
Lease payments applied to:	
Principal portion	(64,494)
Interest portion	(38,448)
At December 31	₱499,522

Future minimum rental receivables under noncancellable operating leases as of December 31, 2019 and 2018 are as follows:

	2019	2018
Within one year	**₱170,868**	₱153,840
After one year but not more than five years	**466,847**	432,477
After five years	**492,893**	581,134
	₱1,130,608	₱1,167,451

Events after the Reporting Date

COVID-19 Outbreak
In a move to contain the COVID-19 outbreak, on March 13, 2020, the Office of the President of the Philippines issued a Memorandum directive to impose stringent social distancing measures in the National Capital Region effective March 15, 2020. On March 16, 2020, Presidential Proclamation No. 929 was issued, declaring a State of Calamity throughout the Philippines for a period of six (6) months and imposed an enhanced community quarantine throughout the island of Luzon until April 12, 2020, which was subsequently extended to April 30, 2020. These measures have caused disruptions to the businesses and economic activities, and its impact on businesses continue to evolve.

The Group considers the events surrounding the outbreak as a non-adjusting subsequent events, which do not impact its financial position and performance as of and for the year ended December 31, 2019. However, the outbreak could have a material impact on its 2020 financial results and even periods thereafter. Considering the evolving nature of this outbreak, the Group cannot determine at this time the impact to its financial position, performance and cashflows. The Group will continue to monitor the situation.

Declaration of Dividends
On February 5, 2020, the Board of Directors of the Parent Company declared cash dividends equivalent to ₱0.106 per share to stockholders of record as of February 19, 2020 and payable on March 17, 2020.

Dividend declaration	522,995	–	–
Interest expense	**–**	–	–
At December 31	₱14,165	₱–	₱440,000

Non-cash transactions

a. *Adoption of PFRS 16*
Effective January 1, 2019, the Group adopted PFRS 16, in which the Group recognized right-of-use assets classified under "Property, plant and equipment" in the statement of financial position and the corresponding Lease liabilities. Additions to the right-of-use assets of the Group in 2019 amounted to ₱51.94 million. The Group recognized additional lease liabilities amounting to ₱41.57 million.

b. *Merger of Parent Company with its Subsidiaries*
On January 31, 2019, the Parent Company issued shares with par value of ₱150.62 million to acquire the net assets of its subsidiaries - IAC, ICC and CLIC including NCI. From total shares issued, ₱4.12 million were issued to minority shareholders and ₱146.50 million were classified as treasury shares.

c. *Advance payment of purchased equipment*
In 2017, the Parent Company paid in advance ₱159.12 million for the installation of its milling equipment for hard wheat (see Note 23). The equipment was installed and completed in 2018 and is classified in the books as Machinery and Equipment amounting to ₱210.58 million (see Note 12).
